December 2023

Dear Shareholder,

Dimensional has been working with financial professionals for more than 40 years to deliver better results for investors. Our commitment to understanding financial professionals' needs and building solutions informed by empirical research and ongoing innovation has helped to transform the industry toward more transparent, data-driven investments.

We use the information contained in market prices to seek better returns and manage risk. Trusting markets means we take a less subjective, more systematic approach to investing—an approach we can implement consistently around the world and across asset classes. Investor needs, economic theory, and robust data guide our investment process, from conducting research, to designing portfolios, to considering when and how to trade.

What started with the launch of our first fund in 1981 still holds true today. Every dollar invested is backed by financial science and Dimensional's commitment to providing an outstanding investment experience. On behalf of everyone at Dimensional, we thank you for entrusting us with your investments.

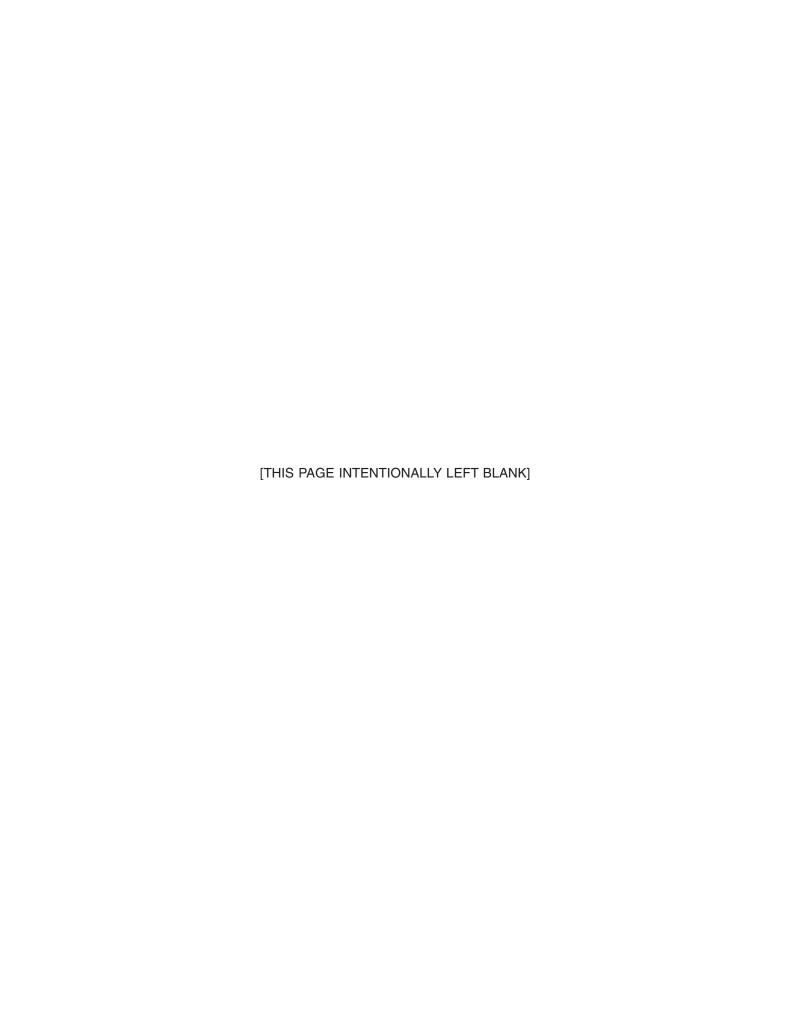

Sincerely,

David P. Butler co-chief executive officer

Dand P. Feller

MANAGEMENT'S DISCUSSION AND ANALYSIS

Fixed Income Market Review

12 Months Ended October 31, 2023

Bond yields generally increased in the U.S. during the 12 months ended October 31, 2023. Longer-term government bonds generally underperformed shorter-term government bonds for the period. Bond yields also generally increased across global developed markets, resulting in the general underperformance of longer-term government bonds across global developed markets as well.

Long-term bond indices generally underperformed short-term bond indices in global developed fixed income markets for the 12 months ended October 31, 2023. For example, the Bloomberg Global Treasury Bond Index 1-3 Years (hedged to USD) returned 3.63%, while the Bloomberg Global Treasury Bond Index 10+ Years (hedged to USD) returned -4.02%. Within the U.S., the Bloomberg U.S. Treasury Bond Index 1-3 Years returned 2.89%, while the Bloomberg U.S. Treasury Bond Index 10+ Years returned -8.50%.

| | October 31, 2022 | October 31, 2023 | <u>Change</u> |
|--------------------------------------|------------------|------------------|---------------|
| One-Month Treasury Bill (yield) | 3.73% | 5.56% | 1.83% |
| Ten-Year U.S. Treasury Notes (yield) | 4.10% | 4.88% | 0.78% |

Source: Bloomberg

Many of Dimensional's fixed income strategies use a variable maturity approach that identifies a maturity range with higher expected returns. When the yield curve is flat or inverted, short-term securities are believed to offer higher expected returns. When the yield curve is upwardly sloped, portfolio maturities may be lengthened to seek the higher expected returns associated with longer maturities. These higher returns may be achieved by capital appreciation (from holding bonds through an upwardly sloped term structure) as well as by earning higher current yields.

During the period under review, within the taxable bond market, the ultrashort- and short-term Portfolios employing a variable maturity approach were generally positioned toward the shorter end of their eligible maturity ranges as short-term bonds generally exhibited higher expected returns, reflecting a generally flat to inverted ultrashort- to short-term segment of eligible yield curves. The intermediate-term Portfolios employing a variable maturity approach focused on a combination of short- and long-term securities as certain eligible yield curves were generally flat to inverted in their short-term segments but were slightly upwardly sloped in their intermediate- to long-term segments. Realized term premiums were negative during the period.

Some of Dimensional's fixed income strategies use a variable credit approach that varies exposure to lower credit quality securities. When credit spreads are narrow, higher-quality securities are emphasized. When credit spreads are wide, additional credit exposure may be taken in order to position a Portfolio to seek higher expected returns by capturing higher expected credit premiums.

Credit spreads were relatively wide over the period, indicating larger expected credit premiums. As a result, the variable credit Portfolios generally maintained their allocations to single-A, BBB, and where allowable and appropriate, BB rated bonds during the period, but were generally below

their maximum allowable weights. Realized credit premiums were positive, as corporate bonds outperformed their government bond counterparts. Both corporate and government bonds outperformed securitized bonds during the period.

For the tax-exempt market, Portfolios employing a variable maturity approach generally focused on the shorter-end of their eligible duration ranges, reflecting the relatively flat slope of eligible municipal curves during the period. Realized term premiums were mixed for municipal securities during the period, with intermediate-term municipal bonds generally underperforming shorter- and longer-term municipal bonds.

DFA One-Year Fixed Income Portfolio

The DFA One-Year Fixed Income Portfolio is designed to achieve a stable real return in excess of the rate of inflation by generally investing in high-quality fixed income securities and maintaining a weighted average portfolio maturity of one year or less. The investment strategy uses a variable maturity approach and shifts maturities based on changes in the yield curve. The strategy uses current yields and identifies favorable maturity ranges of expected returns based on potential buy and sell strategies. Maturity targets are shifted based on Dimensional's expectations for term premiums. The weighted average duration of the Portfolio was 0.21 year as of October 31, 2023, compared to 0.91 year as of October 31, 2022. The weighted average duration of the ICE BofA U.S. 6-Month Treasury Bill Index was 0.47 year as of October 31, 2023, compared to 0.47 year as of October 31, 2022. The weighted average duration of the ICE BofA 1-Year U.S. Treasury Note Index was 0.96 year as of October 31, 2023, compared to 0.97 year as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 4.84% for the Portfolio, 4.88% for the ICE BofA U.S. 6-Month Treasury Bill Index, and 4.07% for the ICE BofA 1-Year U.S. Treasury Note Index, the Portfolio's benchmarks. At the beginning of the period, the U.S. Treasury yield curve was generally upwardly sloped along the Portfolio's eligible maturity segment. However, during the period, the yield curve inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased to the shorter end of its eligible range. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities longer than sixmonths detracted from performance relative to the ICE BofA U.S. 6-Month Treasury Bill Index, while the Portfolio's allocation to securities with maturities shorter than one-year contributed positively to performance relative to the ICE BofA 1-Year U.S. Treasury Note Index.

DFA Two-Year Global Fixed Income Portfolio

The DFA Two-Year Global Fixed Income Portfolio is designed to maximize risk-adjusted total returns consistent with the preservation of capital by investing in U.S. and foreign government securities, high-quality corporate securities, and global fixed income instruments maturing in three years or less (under normal circumstances, the Portfolio will invest at least 80% of its net assets in fixed income securities that mature within two years). The Portfolio also maintains an average portfolio maturity of two years or less. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The investment strategy uses a variable maturity approach and shifts maturities and country allocations based on changes in the eligible yield curves. The weighted average duration of the Portfolio was 0.28 year as of October 31, 2023,

compared to 1.35 years as of October 31, 2022. The weighted average duration of the benchmark was 1.43 years as of October 31, 2023, compared to 1.43 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 4.61% for the Portfolio and 3.63% for the FTSE World Government Bond Index 1-2 Years (hedged to USD), the Portfolio's benchmark. At the beginning of the period, eligible yield curves in global developed markets were generally upwardly sloped along the Portfolio's eligible maturity segment. However, during the period, eligible yield curves inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased to the shorter end of its eligible range. The Portfolio allocated to securities denominated in the Australian dollar, British pound, New Zealand dollar, Swedish krona, and U.S. dollar given higher currency hedged expected returns residing within these markets. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities denominated in the Australian dollar, British pound, Canadian dollar, euro, and U.S. dollar with maturities shorter than one-year contributed positively to relative performance. Furthermore, the Portfolio's underweight to longer-term securities also contributed positively to relative performance.

DFA Selectively Hedged Global Fixed Income Portfolio

The DFA Selectively Hedged Global Fixed Income Portfolio is designed to maximize total returns by investing in U.S. and foreign government securities, investment grade corporate securities, and global fixed income instruments. The Portfolio primarily invests in securities that mature within five years and maintains a weighted average portfolio maturity and duration of three years or less. The Portfolio hedges foreign currency exposure on a selective basis to capture higher interest rates that may be offered in foreign yield curves. The investment strategy uses both variable maturity and variable credit approaches and shifts maturities and country allocations based on changes in the eligible yield curves for each country. Using current yield curves, the strategy identifies the countries and maturity ranges offering favorable expected returns. Maturity targets and country allocations are shifted as expected return premiums change. The Portfolio may emphasize investment grade obligations rated in the lower half of the investment grade spectrum or may deemphasize these securities when Dimensional believes the expected credit premium for holding such securities is relatively low. The weighted average duration of the Portfolio was 0.81 year as of October 31, 2023, compared to 2.37 years as of October 31, 2023, compared to 1.84 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 5.60% for the Portfolio and 3.79% for the FTSE World Government Bond Index 1-3 Years (unhedged) in USD terms, the Portfolio's benchmark. At the beginning of the period, eligible yield curves in global developed markets were generally upwardly sloped along the Portfolio's eligible maturity segment, with higher expected returns generally residing within the zero- to two-year maturity segment. However, during the period, eligible yield curves inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year and underweight to securities in the one- to three-year maturity range, contributed positively to relative performance. Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the

Portfolio was generally near its maximum allocation to single-A and BBB rated corporate securities during the period. Realized credit premiums were generally positive during the period. As a result, the Portfolio's allocation to corporate securities contributed positively to performance relative to the government benchmark. The Portfolio was fully hedged to the U.S. dollar during the period. The U.S. dollar generally depreciated relative to other developed market currencies such as the British pound and euro. As a result, the Portfolio's hedge to the U.S. dollar detracted from performance relative to the unhedged benchmark.

DFA Five-Year Global Fixed Income Portfolio

The DFA Five-Year Global Fixed Income Portfolio is designed to provide a market rate of return by investing in U.S. and foreign government securities, high-quality corporate fixed income securities, and currency-hedged global fixed income instruments maturing in five years or less. The Portfolio also maintains an average portfolio maturity of five years or less. The currency exposure associated with non-U.S. dollar denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The investment strategy uses a variable maturity approach and shifts maturities and country allocations based on changes in the eligible yield curves. The strategy uses current yields and identifies favorable maturity ranges of expected returns based on potential buy and sell strategies for each eligible country. Maturity targets and country allocations are shifted based on Dimensional's expectations for term premiums. The weighted average duration of the Portfolio was 0.34 year as of October 31, 2023, compared to 1.94 years as of October 31, 2022. The weighted average duration of the benchmark was 2.65 years as of October 31, 2023, compared to 2.64 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 4.58% for the Portfolio and 2.96% for the FTSE World Government Bond Index 1-5 Years (hedged to USD), the Portfolio's benchmark. At the beginning of the period, eligible yield curves in global developed markets were generally upwardly sloped along the Portfolio's eligible maturity segment, with higher expected returns generally residing within the zero- to two-year maturity segment. However, during the period, eligible yield curves inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased to the shorter end of its eligible range. The Portfolio allocated to securities denominated in the Australian dollar, British pound, euro, Swedish krona, and U.S. dollar given higher currency hedged expected returns residing within these markets. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities denominated in the Australian dollar, British pound, Canadian dollar, euro, and U.S. dollar with maturities shorter than one-year contributed positively to relative performance. Furthermore, the Portfolio's underweight to longer-term securities, also contributed positively to relative performance.

DFA World ex U.S. Government Fixed Income Portfolio

The DFA World ex U.S. Government Fixed Income Portfolio is designed to maximize total returns by investing in high-quality debt securities issued primarily by non-U.S. government issuers and supranational organizations and their agencies. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The Portfolio primarily invests in securities that mature within 15 years and generally maintains a weighted average duration of no more than a quarter of a year greater than, and no less than one year below, the

weighted average duration of the Portfolio's benchmark. The weighted average duration of the Portfolio was 8.10 years as of October 31, 2023, compared to 8.81 years as of October 31, 2022. The weighted average duration of the benchmark was 7.87 years as of October 31, 2023, compared to 8.56 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 0.45% for the Portfolio and 0.36% for the FTSE Non-USD World Government Bond Index (hedged to USD), the Portfolio's benchmark. During the period, certain eligible yield curves in global developed markets were generally upwardly sloped, indicating larger expected term premiums. As such, the Portfolio maintained a duration similar to that of the benchmark during the period. Realized term premiums were generally negative during the period. As a result, the Portfolio's exclusion of securities with maturities longer than 15-years contributed positively to relative performance. Conversely, the Portfolio's underweight to short-term securities and overweight to intermediate-term securities denominated in the Australian dollar and British pound detracted from relative performance. The Portfolio's exclusion of securities denominated in the Chinese yuan also detracted from relative performance as these securities generally outperformed the global developed markets during the period.

DFA Short-Term Government Portfolio

The DFA Short-Term Government Portfolio is designed to maximize risk-adjusted total returns by investing in U.S. government and U.S. government agency securities maturing in five years or less and maintains a weighted average portfolio maturity and duration of three years or less. The investment strategy uses a variable maturity approach and shifts maturities based on changes in the yield curve. The strategy uses current yields and identifies favorable maturity ranges of expected returns based on potential buy and sell strategies. Maturity targets are shifted based on Dimensional's expectations for term premiums. The weighted average duration of the Portfolio was 0.13 year as of October 31, 2023, compared to 1.01 years as of October 31, 2022. The weighted average duration of the benchmark was 2.54 years as of October 31, 2023, compared to 2.52 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 4.84% for the Portfolio and 2.45% for the ICE BofA 1-5 Year U.S. Treasury and Agency Index, the Portfolio's benchmark. At the beginning of the period, the U.S. Treasury yield curve was generally upwardly sloped along the zero- to two-year maturity segment and flat to inverted beyond two-years. However, during the period, the yield curve fully inverted along the Portfolio's eligible maturity segment, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased to the shorter end of its eligible range. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year, and underweight to longer-term securities, contributed positively to relative performance.

DFA Intermediate Government Fixed Income Portfolio

The DFA Intermediate Government Fixed Income Portfolio is designed to provide current income consistent with the preservation of capital from investing generally in U.S. Treasury and government agency issues with maturities of between five and 15 years. The weighted average duration of the Portfolio was 5.70 years as of October 31, 2023, compared to 5.96 years as of October 31, 2022.

The weighted average duration of the benchmark was 5.64 years as of October 31, 2023, compared to 5.86 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were -0.51% for the Portfolio and -0.55% for the Bloomberg U.S. Government Bond Index, the Portfolio's benchmark. At the beginning of the period, the U.S. Treasury yield curve was generally upwardly sloped along the zero- to two-year maturity segment and flat to inverted beyond two-years. However, during the period, short-term interest rates increased more than longer-term interest rates, causing an inversion in the short- to intermediate-term segment of the yield curve. Realized term premiums were generally negative during the period. As a result, the Portfolio's exclusion of securities with maturities longer than 15-years, and overweight to intermediate-term securities, contributed positively to relative performance. Conversely, the Portfolio's underweight to securities with maturities shorter than three-years detracted from relative performance.

DFA Short-Term Extended Quality Portfolio

The DFA Short-Term Extended Quality Portfolio is designed to maximize total returns by investing in U.S. and foreign corporate debt securities with an investment grade credit rating. The Portfolio uses both variable maturity and variable credit approaches and generally emphasizes investment grade obligations rated in the lower half of the investment grade spectrum except when Dimensional believes the expected credit premium is relatively low. The Portfolio primarily invests in securities that mature within five years and maintains a weighted average portfolio maturity and duration of three years or less. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The weighted average duration of the Portfolio was 0.76 year as of October 31, 2023, compared to 2.31 years as of October 31, 2022. The weighted average duration of the benchmark was 2.55 years as of October 31, 2023, compared to 2.57 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 5.61% for the Portfolio and 3.03% for the ICE BofA 1-5 Year U.S. Corporate & Government Index, the Portfolio's benchmark. At the beginning of the period, eligible yield curves in global developed markets were generally upwardly sloped along the Portfolio's eligible maturity segment, with higher expected returns generally residing within the zero- to two-year maturity segment. However, during the period, eligible yield curves inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased. The Portfolio allocated to securities denominated in the Australian dollar, British pound, Canadian dollar, euro, and U.S. dollar given higher currency hedged expected returns residing within these markets. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year, and underweight to longer-term securities, contributed positively to relative performance. Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Portfolio emphasized single-A and BBB rated corporate securities during the period. Realized credit premiums were generally positive during the period. As a result, the Portfolio's overweight to single-A and BBB rated corporate securities, and underweight to government securities, contributed positively to relative performance.

DFA Intermediate-Term Extended Quality Portfolio

The DFA Intermediate-Term Extended Quality Portfolio is designed to maximize total returns by investing in U.S. and foreign corporate debt securities with an investment grade credit rating. The Portfolio uses a variable credit approach and generally emphasizes investment grade obligations rated in the lower half of the investment grade spectrum, except when Dimensional believes the expected credit premium is relatively low. The Portfolio primarily invests in securities that mature within 20 years and generally maintains a weighted average duration of no more than a quarter of a year greater than, and no less than one year below, the weighted average duration of the Portfolio's benchmark. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The weighted average duration of the Portfolio was 6.30 years as of October 31, 2023, compared to 6.86 years as of October 31, 2022. The weighted average duration of the benchmark was 6.41 years as of October 31, 2023, compared to 6.77 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 3.86% for the Portfolio and 2.69% for the Bloomberg U.S. Credit Bond Index, the Portfolio's benchmark. During the period, certain eligible credit yield curves in global developed markets were generally upwardly sloped in their intermediate- to long-term segments and credit spreads were relatively wide. Thus, within the Portfolio's eligible universe, intermediate-term corporate securities generally exhibited higher expected returns. As such, the Portfolio was underweight to short-term securities and overweight intermediate-term corporate securities relative to the benchmark but maintained a duration similar to that of the benchmark during the period. The Portfolio allocated to securities denominated in the Australian dollar, British pound, euro, and U.S. dollar given higher currency hedged expected returns residing within these markets. Realized term premiums were generally negative, while realized credit premiums were generally positive during the period. As a result, the Portfolio's exclusion of securities with maturities longer than 20-years, and overweight to intermediate-term corporate securities, contributed positively to relative performance. Conversely, the Portfolio's underweight to securities with maturities shorter than three-years detracted from relative performance.

DFA Targeted Credit Portfolio

The DFA Targeted Credit Portfolio seeks to maximize total returns by investing in U.S. and foreign corporate debt securities rated in the lower half of the investment grade spectrum as well as BB rated securities that mature within five years. The Portfolio also maintains a weighted average maturity and duration of five years or less. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The investment strategy uses both variable maturity and variable credit approaches and shifts maturities and country allocations based on changes in the eligible yield curves. The strategy uses current yields and identifies favorable maturity ranges of expected returns based on potential buy and sell strategies for each eligible country. Maturity targets and country allocations are shifted based on Dimensional's expectations for term premiums. While the Portfolio targets debt securities rated single-A, BBB, and BB, it may vary its exposure to credit within this range. The weighted average duration of the Portfolio was 1.54 years as of October 31, 2023, compared to 2.74 years as of October 31, 2022. The weighted average duration of the benchmark was 2.55 years as of October 31, 2023, compared to 2.57 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 5.59% for the Portfolio and 4.73% for the Bloomberg Global Aggregate Credit Bond Index 1-5 Years (hedged to USD), the Portfolio's benchmark. At the beginning of the period, eligible yield curves in global developed markets were generally upwardly sloped along the Portfolio's eligible maturity segment, with higher expected returns generally residing within the zero- to two-year maturity segment. However, during the period, eligible yield curves inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year and underweight to securities in the four- to five-year maturity range, contributed positively to relative performance. Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Portfolio emphasized single-A, BBB, and BB rated corporate securities during the period. Realized credit premiums were generally positive during the period. As a result, the Portfolio's overweight to BBB rated corporate securities and allocation to BB rated corporate securities contributed positively to relative performance. The Portfolio's overweight to corporate securities denominated in the euro also contributed positively to relative performance as these securities generally outperformed within the global developed markets during the period.

DFA Global Core Plus Fixed Income Portfolio

The DFA Global Core Plus Fixed Income Portfolio is designed to maximize total returns by investing in a universe of U.S. and foreign fixed income securities using a variable credit approach. The Portfolio emphasizes investment grade obligations rated in the lower half of the investment grade spectrum, as well as BB-rated securities, except when Dimensional believes the expected credit premium is relatively low. The Portfolio follows a variable maturity strategy within a range of no more than half a year greater than, and no less than one year below, the weighted average duration of the Portfolio's benchmark. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The weighted average duration of the Portfolio was 6.57 years as of October 31, 2023, compared to 7.23 years as of October 31, 2022. The weighted average duration of the benchmark was 6.46 years as of October 31, 2023, compared to 6.70 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 3.79% for the Portfolio and 1.72% for the Bloomberg Global Aggregate Bond Index (hedged to USD), the Portfolio's benchmark. Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Portfolio emphasized single-A, BBB, and BB rated corporate securities during the period. Realized credit premiums were generally positive during the period. As a result, the Portfolio's overweight to single-A and BBB rated corporate securities, and inclusion of BB rated corporate securities, contributed positively to relative performance. During the period, eligible yield curves in global developed markets flattened, indicating smaller expected term premiums. As such, the Portfolio increased its allocation to short-term securities during the period but was still overweight intermediate-term securities relative to the benchmark. Realized term premiums were generally negative during the period. As a result, the Portfolio's underweight to securities with maturities longer than 20-years, and overweight to intermediate-term securities, contributed positively to relative performance.

DFA Investment Grade Portfolio

The DFA Investment Grade Portfolio is designed to maximize total returns through exposure to a broad portfolio of investment grade debt securities of U.S. and non-U.S. corporate and government issuers using a variable credit approach. The Portfolio emphasizes investment grade obligations rated in the lower half of the investment grade spectrum, except when Dimensional believes the expected credit premium is relatively low. The Portfolio primarily invests in securities that mature within 20 years and follows a variable maturity strategy within a range of no more than a quarter of a year greater than, and no less than one year below, the weighted average duration of the Portfolio's benchmark. The currency exposure associated with non-U.S. dollar-denominated securities within the Portfolio is generally hedged back to the U.S. dollar. The weighted average duration of the Portfolio was 5.29 years as of October 31, 2023, compared to 6.12 years as of October 31, 2022. The weighted average duration of the benchmark was 6.04 years as of October 31, 2023, compared to 6.11 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 2.43% for the Portfolio and 0.36% for the Bloomberg U.S. Aggregate Bond Index, the Portfolio's benchmark. During the period, the U.S. yield curve was generally flat to inverted in the short- to intermediate-term maturity segment, indicating smaller expected term premiums. As such, the Portfolio increased its allocation to short-term securities and had a weighted average duration that was shorter than the benchmark over the full period. Realized term premiums were generally negative during the period. As a result, the Portfolio's exclusion of securities with maturities longer than 20-years, and allocation to securities with maturities shorter than one-year, contributed positively to relative performance. Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Portfolio emphasized single-A and BBB rated corporate securities during the period. Realized credit premiums were generally positive during the period. As a result, the Portfolio's overweight to single-A and BBB rated corporate securities contributed positively to relative performance. The Portfolio's exclusion of securitized securities also contributed positively to relatively performance, as these securities underperformed corporate and government securities during the period.

DFA Diversified Fixed Income Portfolio

The DFA Diversified Fixed Income Portfolio is designed to provide a market rate of return for a fixed income portfolio with low relative volatility by investing directly or through other funds managed by Dimensional ("Underlying Funds") in a universe of U.S. and foreign debt securities, including inflation-protected securities. During the period covered by this report, the Portfolio's investments in Underlying Funds included the DFA Two-Year Global Fixed Income Portfolio and DFA Intermediate Government Fixed Income Portfolio. Generally, the Portfolio or the Underlying Funds will purchase debt securities that mature within 20 years. The weighted average duration of the Portfolio was 3.07 years as of October 31, 2023, compared to 3.67 years as of October 31, 2022. The weighted average duration of the benchmark was 3.62 years as of October 31, 2023, compared to 3.71 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 1.97% for the Portfolio and 1.46% for the Bloomberg U.S. Intermediate Government Bond Index, the Portfolio's benchmark. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year, and underweight to intermediate-term securities,

contributed positively to relative performance. Realized inflation was higher than expected inflation during the period. As a result, the Portfolio's allocation to inflation-protected securities relative to the nominal benchmark also contributed positively to relative performance.

DFA LTIP Portfolio

The DFA LTIP Portfolio seeks to provide total return composed of income and capital appreciation consistent with inflation-protected long-term instruments. The Portfolio generally invests in inflation-protected securities issued by the U.S. government and its agencies and instrumentalities with maturities longer than 10 years. The weighted average duration of the Portfolio was 25.62 years as of October 31, 2023, compared to 26.27 years as of October 31, 2022. The weighted average duration of the benchmark was 20.97 years as of October 31, 2023, compared to 21.63 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were -14.47% for the Portfolio and -11.25% for the FTSE U.S. Inflation-Linked Securities Index 20+ Years, the Portfolio's benchmark. Real interest rates increased during the period. As such, the Portfolio's longer duration detracted from relative performance, as realized real term premiums were generally negative in the U.S. Treasury Inflation-Protected Securities market.

DFA Inflation-Protected Securities Portfolio

The DFA Inflation-Protected Securities Portfolio is designed to provide inflation protection and current income by investing in inflation-protected securities (TIPS) issued by the U.S. government and its agencies and instrumentalities with maturities of between five and 20 years. The weighted average duration of the Portfolio was 6.70 years as of October 31, 2023, compared to 6.90 years as of October 31, 2022. The weighted average duration of the benchmark was 6.44 years as of October 31, 2023, compared to 6.67 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were -0.54% for the Portfolio and -0.72% for the Bloomberg U.S. TIPS Index, the Portfolio's benchmark. Real interest rates increased during the period and long-term TIPS underperformed short-term TIPS. As a result, the Portfolio's exclusion of TIPS with maturities longer than 20-years contributed positively to relative performance. Conversely, the Portfolio's underweight to short-term TIPS and overweight to intermediate-term TIPS detracted from relative performance.

DFA Short-Duration Real Return Portfolio

The DFA Short-Duration Real Return Portfolio is designed to seek inflation protection and maximize total returns. The strategy pursues its investment objective by using both variable maturity and variable credit approaches and investing in a combination of investment grade debt securities and inflation-protected securities that mature within five years, and derivative instruments such as inflation swaps. The Portfolio maintains a weighted average portfolio duration of three years or less. The weighted average duration of the Portfolio was 0.93 year as of October 31, 2023, compared to 2.68 years as of October 31, 2023, compared to 2.82 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 5.38% for the Portfolio and 2.15% for the Bloomberg U.S. TIPS 1-5 Years Index, the Portfolio's benchmark. During the period, the U.S. real yield curve was generally flat or inverted along the Portfolio's eligible maturity range, indicating smaller expected real term premiums. As such, the Portfolio's duration was decreased and was shorter than that of the benchmark during the period. Realized real term premiums were generally negative during the period. As a result, the Portfolio's shorter weighted average duration contributed positively to relative performance. Realized credit premiums were generally positive during the period. As a result, the Portfolio's allocation to corporate securities also contributed positively to performance relative to the TIPS-only benchmark.

DFA Global Core Plus Real Return Portfolio

The DFA Global Core Plus Real Return Portfolio is designed to seek inflation protection and maximize total returns. The strategy pursues its investment objective by using both variable maturity and variable credit approaches and investing in a combination of investment grade debt securities, BB rated securities, inflation-protected securities, and derivative instruments such as inflation swaps. The portfolio follows a variable maturity strategy within a range of no more than half a year greater than, and no less than one year below, the weighted average duration of the Portfolio's benchmark. The weighted average duration of the Portfolio was 6.63 years as of October 31, 2023, compared to 7.48 years as of October 31, 2022. The weighted average duration of the benchmark was 6.46 years as of October 31, 2023, compared to 6.70 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 3.14% for the Portfolio and 1.72% for the Bloomberg Global Aggregate Bond Index (hedged to USD), the Portfolio's benchmark. Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Portfolio emphasized single-A, BBB, and BB rated corporate securities during the period. Realized credit premiums were generally positive during the period. As a result, the Portfolio's overweight to single-A and BBB rated corporate securities, and inclusion of BB rated corporate securities, contributed positively to relative performance. During the period, eligible yield curves in global developed markets flattened, indicating smaller expected term premiums. As such, the Portfolio increased its allocation to short-term securities during the period but was still overweight intermediate-term securities relative to the benchmark. Realized term premiums were generally negative during the period. As a result, the Portfolio's underweight to securities with maturities longer than 20-years, and overweight to intermediate-term securities, contributed positively to relative performance. The Portfolio's zero-coupon inflation swaps, designed for protection from unexpected inflation, detracted from relative performance as breakeven inflation rates decreased during the period. The benchmark is a nominal interest rate benchmark that does not contain an inflation-protection component.

DFA INVESTMENT DIMENSIONS GROUP INC. DISCLOSURE OF FUND EXPENSES

(Unaudited)

The following Expense Tables are shown so that you can understand the impact of fees on your investment. All mutual funds have operating expenses. As a shareholder of the fund, you incur ongoing costs, which include costs for portfolio management, administrative services, and shareholder reports, among others. Operating expenses and legal and audit services, which are deducted from a fund's gross income, directly reduce the investment return of the fund. A fund's expenses are expressed as a percentage of its average net assets. This figure is known as the expense ratio. The following examples are intended to help you understand the ongoing costs, in dollars, of investing in the fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period.

The Expense Tables below illustrate your fund's costs in two ways.

Actual Fund Return

This section helps you to estimate the actual expenses after fee waivers that you paid over the period. The "Ending Account Value" shown is derived from the fund's actual return and "Expenses Paid During Period" reflects the dollar amount that would have been paid by an investor who started with \$1,000 in the fund. You may use the information here, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number given for your fund under the heading "Expenses Paid During Period."

Hypothetical Example for Comparison Purposes

This section is intended to help you compare your fund's costs with those of other mutual funds. The hypothetical "Ending Account Value" and "Expenses Paid During Period" are derived from the fund's actual expense ratio and an assumed 5% annual return before expenses. In this case, because the return used is not the fund's actual return, the results do not apply to your investment. The example is useful in making comparisons because the SEC requires all mutual funds to calculate expenses based on a 5% annual return. You can assess your fund's costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Please note that the expenses shown in the tables are meant to highlight and help you compare ongoing costs only and do not reflect any transactional costs, if applicable. The "Annualized Expense Ratio" represents the actual expenses for the six-month period indicated.

⁽¹⁾ Expenses are equal to the fund's annualized expense ratio for the six-month period, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period (184), then divided by the number of days in the year (365) to reflect the six-month period.

⁽²⁾ DFA Diversified Fixed Income Portfolio invests directly and indirectly through other funds. The expenses shown reflect the direct expenses of the Portfolio and the Portfolio's portion of the expenses of its Underlying Funds (Affiliated Investment Companies).

DFA INVESTMENT DIMENSIONS GROUP INC. DISCLOSURE OF PORTFOLIO HOLDINGS

(Unaudited)

The SEC requires that all funds file a complete Schedule of Investments with the SEC for their first and third fiscal quarters as an exhibit to their reports on Form N-PORT. For DFA Investment Dimensions Group Inc., this would be for the fiscal quarters ending January 31 and July 31. Such Form N-PORT filing must be made within 60 days of the end of the quarter. DFA Investment Dimensions Group Inc. filed its most recent Form N-PORT with the SEC on September 29, 2023 (October 19, 2023 with respect to DFA Global Core Plus Real Return Portfolio, DFA Targeted Credit Portfolio, DFA Global Core Plus Fixed Income Portfolio, DFA Five-Year Global Fixed Income Portfolio, DFA Two-Year Global Fixed Income Portfolio, DFA Investment Grade Portfolio, DFA Short-Term Government Portfolio, DFA Selectively Hedged Global Fixed Income Portfolio, DFA One-Year Fixed Income Portfolio, DFA Intermediate-Term Extended Quality Portfolio, and DFA Short-Term Extended Quality and DFA Short-Term Extended Quality Portfolio). They are available upon request, without charge, by calling collect: (512) 306-7400; by mailing a request to Dimensional Fund Advisors LP, 6300 Bee Cave Road, Building One, Austin, TX 78746; or by visiting the SEC's website at http://www.sec.gov.

PORTFOLIO HOLDINGS

The SEC requires that all funds present their categories of portfolio holdings in a table, chart, or graph format in their annual and semi-annual shareholder reports, whether or not a Schedule of Investments is used. The following tables, which present portfolio holdings as a percentage of total investments before short-term investments and collateral for loaned securities, are provided in compliance with this requirement. The categories shown below represent broad industry sectors. Each industry sector consists of one or more specific industry classifications.

DFA INVESTMENT DIMENSIONS GROUP INC. NOTES TO FINANCIAL STATEMENTS

A. Organization:

DFA Investment Dimensions Group Inc. (the "Fund") is an open-end management investment company registered under the Investment Company Act of 1940 (the "1940 Act"), whose shares are generally offered to institutional investors, retirement plans and clients of registered investment advisors. The Fund consists of one hundred and two operational portfolios, of which seventeen (the "Portfolios") are included in this report. The remaining operational portfolios are presented in separate reports. The Portfolios are investment companies, and accordingly, follow the accounting and reporting guidance under the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"), Topic 946, "Financial Services-Investment Companies."

The DFA Diversified Fixed Income Portfolio achieves its investment objective by investing directly in securities as listed on its Schedule of Investments and/or in other series of the Fund as indicated below (collectively, the "Underlying Funds"). The Underlying Funds' shareholder reports are included in this report. As of October 31, 2023, the Portfolio was the owner of record of the following approximate percentages of the total outstanding shares of the following Underlying Funds as detailed below:

| Fund of Funds | Underlying Funds | Ownership at 10/31/23 |
|--|--|--------------------------|
| DFA Diversified Fixed Income Portfolio | DFA Two-Year Global Fixed Income Portfolio | 11% |
| | DFA Intermediate Government Fixed Income | |
| | Portfolio | 16% |

Darcantage

B. Significant Accounting Policies:

The following significant accounting policies are in conformity with accounting principles generally accepted in the United States of America ("GAAP"). Such policies are consistently followed by the Fund in preparation of its financial statements. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the fair value of investments, the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates, and those differences could be material.

- 1. Security Valuation: The Portfolios use a fair value hierarchy, which prioritizes the inputs-to-valuation techniques used to measure fair value into three broad levels described below:
 - Level 1 inputs are quoted prices in active markets for identical securities (including equity securities, open-end investment companies, and futures contracts)
 - Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
 - Level 3 significant unobservable inputs (including the Portfolios' own assumptions in determining the fair value of investments)

Debt securities held by the Portfolios are valued on the basis of evaluated prices provided by one or more pricing services or other reasonably reliable sources including broker/dealers that typically handle the purchase and sale of such securities. Securities that are traded over-the-counter and on a stock exchange generally will be valued according to the broadest and most representative market, and it is expected that for bonds and other fixed income securities, this ordinarily will be the over-the-counter market. Securities for which quotations are not readily available (including restricted securities), or for which market quotations have become unreliable, are valued in good faith at fair value in accordance with Rule 2a-5 under the 1940 Act pursuant to procedures approved by the Board of Directors of the Fund. These securities are generally categorized as Level 2 or Level 3 in the hierarchy.

Over-the-counter derivative contracts, which include forward currency contracts, do not require material subjectivity as pricing inputs are observed from quoted markets and are categorized as Level 2 in the hierarchy. Swap agreements will be valued at the price provided by an independent third-party pricing service or source. If a price is not available from an independent third-party pricing service or source, the swap agreement will be valued in good faith at fair value in accordance with procedures approved by the Board. These securities are generally categorized as Level 2 in the hierarchy.

Shares held by the Portfolios in other investment companies (such as the Underlying Funds shares held by the DFA Diversified Fixed Income Portfolio) are valued at their respective daily net asset values as reported by their administrator. These valuations are classified as Level 1 in the hierarchy.

A summary of the inputs used to value the Portfolios' investments by each major security type, industry and/or country is disclosed previously in this note. Valuation hierarchy tables have been included at the end of the Schedules of Investments. The methodology or inputs used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

2. Foreign Currency Translation: Securities and other assets and liabilities of DFA Two-Year Global Fixed Income Portfolio, DFA Selectively Hedged Global Fixed Income Portfolio, DFA Five-Year Global Fixed Income Portfolio, DFA World ex U.S. Government Fixed Income Portfolio, DFA Short-Term Extended Quality Portfolio, DFA Intermediate-Term Extended Quality Portfolio, DFA Targeted Credit Portfolio, DFA Global Core Plus Fixed Income Portfolio, DFA Global Core Plus Real Return Portfolio (the "International Fixed Income Portfolios"), DFA Investment Grade Portfolio, DFA Diversified Fixed Income Portfolio, DFA LTIP Portfolio and DFA Short-Duration Real Return Portfolio whose values are initially expressed in foreign currencies are translated to U.S. dollars using the mean between the most recent bid and ask prices for the U.S. dollar as quoted by generally recognized reliable sources. To facilitate the translation, the Portfolios enter into foreign currency contracts. A foreign currency contract is a spot agreement between two parties to buy and sell currencies at current market exchange rates, for settlement generally within two business days. Dividend and interest income and certain expenses are translated to U.S. dollars at the rate of exchange on their respective accrual dates. Receivables and payables denominated in foreign currencies are marked-to-market daily based on daily exchange rates and exchange gains or losses are realized upon ultimate receipt or disbursement. The International Fixed Income Portfolios, DFA Investment Grade Portfolio, DFA Diversified Fixed Income Portfolio, DFA LTIP Portfolio and DFA Short-Duration Real Return Portfolio may also enter into foreign currency forward contracts to attempt to protect against uncertainty in the level of future foreign currency rates, to hedge against fluctuations in currency exchange rates or to transfer balances from one currency to another. DFA Selectively Hedged Global Fixed Income Portfolio may hedge the currency exposure of its foreign securities or leave some or all of the currency exposure unhedged. The DFA Selectively Hedged Global Fixed Income Portfolio may also enter into foreign currency forward contracts in order to gain exposure to foreign currencies in a more efficient manner. Forward currency contracts are marked-to-market daily based on daily forward exchange rates.

The International Fixed Income Portfolios, DFA Investment Grade Portfolio, DFA Diversified Fixed Income Portfolio and DFA Short-Duration Real Return Portfolio isolate the effect of foreign currency rate fluctuations when determining the realized gain or loss upon the sale or maturity of foreign currency-denominated debt obligations pursuant to U.S. Federal income tax regulations; such amounts are categorized as foreign exchange gain or loss for income tax reporting purposes.

Realized gains or losses on foreign currency transactions represent net foreign exchange gains or losses from the disposition of foreign currencies, currency gains or losses realized between the trade and settlement dates of securities transactions, and the difference between amounts of interest, dividends and any foreign withholding taxes recorded on the books of the International Fixed Income Portfolios, DFA Investment Grade Portfolio, DFA Diversified Fixed Income Portfolio and DFA Short-Duration Real Return Portfolio and the U.S. dollar equivalent amounts actually received or paid.

3. Treasury Inflation-Protected Securities (TIPS): Inflation-protected securities (also known as inflation indexed securities) are securities whose principal and/or interest payments are adjusted for inflation, unlike conventional debt securities that make fixed principal and interest payments. Inflation-protected securities include Treasury Inflation-Protected Securities ("TIPS"), which are securities issued by the U.S. Treasury. The principal value of TIPS is adjusted for inflation (payable at maturity) and the semi-annual interest payments by TIPS equal a fixed percentage

of the inflation-adjusted principal amount. These inflation adjustments are based upon the Consumer Price Index for Urban Consumers (CPI-U). The original principal value of TIPS is guaranteed, even during period of deflation. At maturity, TIPS are redeemed at the greater of their inflation-adjusted principal or par amount at original issue. Other types of inflation-protected securities may use other methods to adjust for inflation and other measures of inflation. Additionally, inflation-protected securities issued by entities other than the U.S. Treasury may not provide a guarantee of principal value at maturity.

- 4. To-Be-Announced (TBA) Commitments: TBA commitments are commitments to purchase or sell mortgage-backed securities for a fixed price at a future date, typically not exceeding 90 days. TBA's may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date. This risk is in addition to the risk of decline in each Portfolio's other assets. Unsettled TBA securities are valued by an independent pricing service based on the characteristics of the securities to be delivered or received.
- 5. Deferred Compensation Plan: Each eligible Director of the Fund may elect to participate in the Fee Deferral Plan for Independent Directors and Trustees (the "Plan"). Under the Plan, effective January 1, 2002, such Directors may defer payment of all or a portion of their total fees earned as a Director. These deferred amounts may be treated as though such amounts had been invested in shares of the following funds: the U.S. Large Cap Value Portfolio, U.S. Core Equity 1 Portfolio, U.S. Large Company Portfolio, U.S. Vector Equity Portfolio, U.S. Micro Cap Portfolio, DFA International Value Portfolio, International Core Equity Portfolio, Emerging Markets Portfolio, Emerging Markets Core Equity Portfolio, DFA Inflation-Protected Securities Portfolio, and/or DFA Two-Year Global Fixed Income Portfolio. Contributions made under the Plan and the change in unrealized appreciation (depreciation) and income are included in Directors'/ Trustees' Fees & Expenses.

The Directors may receive their distributions of proceeds by one of the following methods: lump sum, annual installments over a period of agreed-upon years, or quarterly installments over a period of agreed-upon years. Each Director shall have the right in a notice of election (the "Notice") to defer the receipt of the Director's deferred compensation until a date specified by such Director in the Notice. The date may not be sooner than the earlier of: (i) the first business day of January following the year in which such Director ceases to be a member of the Board of Directors of the Fund; and (ii) five years following the effective date of the Director's first deferral election. If a Director who elects to defer fees fails to designate in the Notice a time or date as of which payment of the Director's deferred fee account shall commence, payment of such amount shall commence as of the first business day of January following the year in which the Director ceases to be a member of the Board (unless the Director files an amended Notice selecting a different distribution date).

6. Other: Security transactions are accounted for as of the trade date. Costs used in determining realized gains and losses on the sale of investment securities/affiliated investment companies and foreign currency are accounted for on the basis of identified cost. Dividend income and distributions to shareholders are recorded on the ex-dividend date. Non-cash dividend income received in the form of securities in-lieu of cash, if any, are recorded at the fair value of securities received. Distributions received on securities and from the investment in affiliated investment companies that represent a return of capital or capital gains are recorded as a reduction of cost of investments or as a realized gain, respectively. The Portfolios estimate the character of received distributions that may be considered return of capital distributions. Interest income is recorded on an accrual basis. Discount and premium on debt securities purchased are amortized over the lives of the respective securities, using the effective interest method. Expenses directly attributable to a Portfolio are directly charged. Common expenses of the Fund or the Portfolios are allocated using methods approved by the Board, generally based on average net assets.

The Portfolios may be subject to taxes imposed by countries in which they invest with respect to their investments in issuers existing or operating in such countries. Such taxes are generally based on income earned or repatriated and capital gains realized on the sale of such investments. The Portfolios accrue such taxes when the related income or capital gains are earned or throughout the holding period. Some countries require governmental approval for the repatriation of investment income, capital or the proceeds of sales earned by foreign investors. Additionally, if there is a deterioration in a country's balance of payments or for other reasons, a country may impose temporary restrictions on foreign capital remittances abroad.

Organizational costs are expensed during the fiscal year of inception of the Portfolios. Offering costs are amortized over a twelve-month period from the inception of the Portfolios.

C. Investment Advisor:

The Advisor, Dimensional Fund Advisors LP, provides investment management services to the Portfolios. For the year ended October 31, 2023, the Portfolios' investment management fees were accrued daily and paid monthly to the Advisor based on the following effective annual rates of average daily net assets:

| DFA One-Year Fixed Income Portfolio | 0.10% |
|--|--------|
| DFA Two-Year Global Fixed Income Portfolio | 0.14% |
| DFA Selectively Hedged Global Fixed Income Portfolio | 0.14% |
| DFA Five-Year Global Fixed Income Portfolio | 0.19%* |
| DFA World ex U.S. Government Fixed Income Portfolio | 0.16%* |
| DFA Short-Term Government Portfolio | 0.15%* |
| DFA Intermediate Government Fixed Income Portfolio | 0.09% |
| DFA Short-Term Extended Quality Portfolio | 0.15%* |
| DFA Intermediate-Term Extended Quality Portfolio | 0.16%* |
| DFA Targeted Credit Portfolio | 0.18% |
| DFA Global Core Plus Fixed Income Portfolio | 0.21%* |
| DFA Investment Grade Portfolio | 0.16%* |
| DFA Diversified Fixed Income Portfolio | 0.12% |
| DFA LTIP Portfolio | 0.10% |
| DFA Inflation-Protected Securities Portfolio | 0.09% |
| DFA Short-Duration Real Return Portfolio | 0.18% |
| DFA Global Core Plus Real Return Portfolio | 0.21%* |

^{*} Effective as of February 28, 2023, the management fees payable by the following Portfolios were reduced as follows:

| | Management Fee Prior to | Management Fee Effective |
|---|-------------------------|--------------------------|
| Portfolio | February 28, 2023 | February 28, 2023 |
| DFA Five-Year Global Fixed Income Portfolio | 0.20% | 0.18% |
| DFA World ex U.S. Government Fixed Income Portfolio | 0.17% | 0.16% |
| DFA Short-Term Government Portfolio | 0.16% | 0.14% |
| DFA Short-Term Extended Quality Portfolio | 0.16% | 0.15% |
| DFA Intermediate-Term Extended Quality Portfolio | 0.17% | 0.16% |
| DFA Global Core Plus Fixed Income Portfolio | 0.22% | 0.20% |
| DFA Investment Grade Portfolio | 0.17% | 0.16% |
| DFA Global Core Plus Real Return Portfolio | 0.22% | 0.21% |

Pursuant to Amended and Restated Fee Waiver and/or Expense Assumption Agreements (each, a "Fee Waiver Agreement"), the Advisor has contractually agreed to waive certain fees, and in certain instances, assume certain expenses of the Portfolios, as described in the notes below. The Fee Waiver Agreements for each of the Portfolios will remain in effect through February 28, 2024. The Fee Waiver Agreements may only be terminated by the Fund's Board of Directors prior to such applicable date and shall continue in effect from year to year thereafter unless terminated by the Fund or the Advisor. During the year ended October 31, 2023, the Portfolios had expense limits based on a percentage of average net assets on an annualized basis, and the Advisor recovered previously waived fees and/or assumed expenses (amounts in thousands), as listed below. The net amount of waived fees/expenses assumed (recovered previously waived fees/expenses assumed) during the year ended October 31, 2023, and the previously waived fees/expenses assumed subject to future recovery by the Advisor as of October 31, 2023, are also reflected below (amounts in thousands). At any time that the Portfolio Expenses (defined below) of the Institutional Class of a Portfolio are less than the Expense Limitation Amount listed below, the Advisor retains the right to recover fees previously waived and/or expenses previously assumed to the extent that the expense ratio following such

recovery would be less than the Expense Limitation Amount that was in place when such prior year fees were waived and/or expenses assumed, and less than the current Expense Limitation Amount in place for the Portfolio. The Fund, on behalf of the Portfolios, is not obligated to reimburse the Advisor for fees previously waived or expenses previously assumed by the Advisor more than thirty-six months before the date of recovery. With respect to the DFA Short-Duration Real Return Portfolio, the Advisor shall also not be reimbursed for any management fees previously waived to offset the Portfolio's proportionate share of the management fees paid by such Portfolio through its investment in other funds managed by the Advisor.

⁽¹⁾ The Advisor has contractually agreed to waive all or a portion of its management fee and assume the ordinary operating expenses of a class of each of the Portfolios listed above (excluding the expenses that the Portfolio incurs indirectly through its investment in other investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of a class of each Portfolio, on an annualized basis, to the rates listed above as a percentage of a class of the respective Portfolio's average net assets (the "Expense Limitation Amount"). Prior to February 28, 2022, the Expense Limitation Amounts for each of DFA Short-Term Extended Quality Portfolio and DFA Intermediate-Term Extended Quality Portfolio was 0.22%.

⁽²⁾ The Advisor has contractually agreed to waive all or a portion of its management fee to the extent necessary to reduce the ordinary operating expenses (excluding expenses incurred through its investment in other investment companies) ("Portfolio Expenses") of a class of the Portfolio so that such Portfolio Expenses, on an annualized basis, do not exceed the rate reflected above for a class of the Portfolio (the "Expense Limitation Amount").

⁽³⁾ The Advisor has contractually agreed to waive all or a portion of its management fee and to assume the ordinary operating expenses of a class of the Portfolio (including the expenses that the Portfolio bears as a shareholder of other funds managed by the Advisor, excluding money market funds, but excluding the expenses that the Portfolio incurs indirectly through its investment in unaffiliated investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of a class of the Portfolio to the rate listed above as a percentage of the average net assets of a class of the Portfolio on an annualized basis (the "Expense Limitation Amount"). Prior to February 28, 2022, the Portfolio on an annualized basis.

- (4) The Advisor has agreed to waive all or a portion of its management fee and to assume the expenses of a class of the Portfolio (including the expenses that the Portfolio bears as a shareholder of other funds managed by the Advisor but excluding the expenses that the Portfolio incurs indirectly through investment of its securities lending cash collateral in The DFA Short Term Investment Fund (the "Money Market Series") and its investment in unaffiliated investment companies) ("Portfolio Expenses") to the extent necessary to limit Portfolio Expenses of a class of the Portfolio, on an annualized basis, to the rate listed above as a percentage of the average net assets of a class of the Portfolio (the "Expense Limitation Amount"). Prior to February 28, 2022, the Expense Limitation Amount for the Portfolio was 0.22% of the average net assets of such class of the Portfolio on an annualized basis.
- (5) The Advisor has contractually agreed to waive up to the full amount of the Portfolio's management fee of 0.18% to the extent necessary to offset the proportionate share of the management fees paid by the Portfolio through its investment in other funds managed by the Advisor, except for the fees paid through its investment of securities lending cash collateral in the Money Market Series (the "Underlying Funds"). In addition, under the Fee Waiver Agreement, the Advisor has also agreed to waive all or a portion of the management fee and to assume the ordinary operating expenses of a class of the Portfolio (including the expenses that the Portfolio bears as a shareholder of other funds managed by the Advisor but excluding the expenses that the Portfolio incurs indirectly through investment of its securities lending cash collateral in the Money Market Series and the expenses that the Portfolio incurs indirectly through its investment in unaffiliated investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of a class of the Portfolio to the rate listed above as a percentage of the average net assets of a class of the Portfolio on an annualized basis (the "Expense Limitation Amount").

Earned Income Credit:

Additionally, the Portfolios have entered into arrangements with their custodian whereby net interest earned on uninvested cash balances was used to reduce a portion of the Portfolios' custody expenses. Custody expense in the accompanying financial statements is presented before reduction for credits. The impact of such credits is generally less than one basis point of each Portfolio's net assets. During the year ended October 31, 2023, expenses reduced were as follows (amounts in thousands):

| | Fees Paid Indirectly |
|--|----------------------|
| DFA Two-Year Global Fixed Income Portfolio | \$ 34 |
| DFA Selectively Hedged Global Fixed Income Portfolio | 23 |
| DFA Five-Year Global Fixed Income Portfolio | 101 |
| DFA World ex U.S. Government Fixed Income Portfolio | 51 |
| DFA Short-Term Extended Quality Portfolio | 100 |
| DFA Intermediate-Term Extended Quality Portfolio | 2 |
| DFA Targeted Credit Portfolio | 3 |
| DFA Global Core Plus Fixed Income Portfolio | 56 |
| DFA Investment Grade Portfolio | 98 |
| DFA LTIP Portfolio | 2 |
| DFA Global Core Plus Real Return Portfolio | 14 |

Fees Paid to Officers and Directors/Trustees:

Certain Officers and Directors of the Advisor are also Officers and Directors of the Fund; however, such Officers and Directors (with the exception of the Chief Compliance Officer ("CCO")) receive no compensation from the Fund. For the year ended October 31, 2023, the total related amount paid by the Fund to the CCO was \$177 (in thousands). The total related amounts paid by each of the Portfolios are included in Other Expenses on the Statements of Operations.

D. Deferred Compensation:

As of October 31, 2023, the total liability for deferred compensation to Directors is included in Accrued Expenses and Other Liabilities on the Statements of Assets and Liabilities as follows (amounts in thousands):

| DFA One-Year Fixed Income Portfolio | \$197 |
|--|-------|
| DFA Two-Year Global Fixed Income Portfolio | 146 |
| DFA Selectively Hedged Global Fixed Income Portfolio | 12 |
| DFA Five-Year Global Fixed Income Portfolio | 133 |

F. Federal Income Taxes:

Each Portfolio has qualified and intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code for federal income tax purposes and to distribute substantially all of its taxable income and net capital gains to its shareholders. Accordingly, no provision has been made for federal income taxes.

Distributions from net investment income and net realized capital gains are determined in accordance with U.S. federal income tax regulations, which may differ from those amounts determined under GAAP. These book/tax differences are either temporary or permanent in nature. To the extent that these differences are permanent, they are charged or credited to paid-in capital or distributable earnings, undistributed net investment income, accumulated net realized gains or losses, or unrealized appreciation, as appropriate, in the period that the differences arise. Accordingly, the permanent differences as of October 31, 2023, can occur as a result of realized gains on securities considered to be "passive foreign investment companies," non-deductible expenses, realized foreign capital gains

tax, net foreign currency gains/losses, the use of accumulated earnings and profits distributed to shareholders on redemptions of shares as part of the dividends paid deduction for income tax purposes, distributions received from real estate investment trusts and distribution redesignations, and bond amortization, and were reclassified to the accounts mentioned above. These reclassifications had no effect on net assets or net asset value per share.

The tax character of dividends and distributions declared and paid during the years ended October 31, 2022, and October 31, 2023, were as follows (amounts in thousands):

| | Net Investment Income and Short-Term Capital Gains | Long-Term Capital Gains | Tax Exempt Income | Total |

For federal income tax purposes, the Fund measures its capital loss carryforwards annually at October 31, its fiscal year end. Capital loss carryforwards may be carried forward and applied against future capital gains. As of October 31, 2023, the Portfolios had the following capital loss carryforwards available to offset future realized capital gains with no expiration date (amounts in thousands):

During the year ended October 31, 2023, the Portfolios did not use capital loss carryforwards to offset realized capital gains for federal income tax purposes.

As of October 31, 2023, the total cost and aggregate gross unrealized appreciation (depreciation) of securities for federal income tax purposes were different from amounts reported for financial reporting purposes, as follows (amounts in thousands):

| | Federal Tax Cost | Unrealized Appreciation | Unrealized (Depreciation) | Net Unrealized Appreciation (Depreciation) |
|--|---------------------|----------------------------|------------------------------|--|
| DFA One-Year Fixed Income Portfolio | \$ 4,488,611 | \$ 1,231 | \$ (9,706) | \$ (8,475) |
| DFA Two-Year Global Fixed Income Portfolio | 4,599,924 | 10,965 | (34,398) | (23,433) |

The difference between GAAP-basis and tax-basis unrealized gains (losses) can occur as a result of wash sales and net mark-to-market gains (losses) on regulated futures contracts, net mark-to-market gains (losses) on foreign currency contracts, and differences in the tax treatment of passive foreign investment company investments or other investments.

ASC 740 Accounting for Uncertainty in Income Taxes sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Management has analyzed the Portfolios' tax positions and has concluded that no additional provision for income tax is required in the Portfolios' financial statements. The Portfolios are not aware of any tax positions for which it is more likely than not that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Portfolios' federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

G. Financial Instruments:

In accordance with the Portfolios' investment objectives and policies, the Portfolios may invest in certain financial instruments that have off-balance sheet risk in excess of the amounts recognized in the financial statements and concentrations of credit and market risk. These instruments and their significant corresponding risks are described below:

- 1. Foreign Market Risks: Investments in foreign markets may involve certain considerations and risks not typically associated with investments in the United States of America, including the possibility of future political and economic developments and the level of foreign governmental supervision and regulation of foreign securities markets. These markets are generally smaller, less liquid and more volatile than the major securities markets in the United States of America. Consequently, acquisition and disposition of international securities held by the Portfolios may be inhibited.
- 2. Inflation Protection Risks: Because the interest and/or principal payments on an inflation-protected security are adjusted periodically for changes in inflation, the income distributed by the DFA Diversified Fixed Income Portfolio, DFA LTIP Portfolio, DFA Inflation-Protected Securities Portfolio, DFA Short-Duration Real Return Portfolio and DFA Global Core Plus Real Return Portfolio may be irregular. Although the U.S. Treasury guarantees to pay at maturity at least the original face value of any inflation-protected securities the Treasury issues, other issuers may not offer the same guarantee. Also, inflation-protected securities, including those issued by the U.S. Treasury, are not protected against deflation. As a result, in a period of deflation, the inflation-protected securities held by a Portfolio may not pay income and the Portfolio may suffer a loss during such periods. While inflation-protected securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in a Portfolio's value. For example, if interest rates rise due to reasons other than inflation, the Portfolio's investment in these securities may not be protected to the extent that the increase is not reflected in the securities' inflation measures. Additionally, positive adjustments to principal generally will result in taxable income to a Portfolio at the time of such adjustments (which generally would be distributed by the Portfolio as part of its taxable dividends), even though the principal amount is not paid until maturity. The current market value of inflation-protected securities is not guaranteed and will fluctuate.

Derivative Financial Instruments:

Summarized below are the specific types of derivative instruments used by Portfolios.

- 3. Forward Currency Contracts: The Portfolios listed below may enter into foreign currency forward contracts to attempt to protect against uncertainty in the level of future foreign currency rates, to hedge against fluctuations in currency exchange rates or to transfer balances from one currency to another. The decision to hedge a Portfolio's currency exposure with respect to a foreign market will be based primarily on the Portfolio's existing exposure to a given foreign currency. DFA Selectively Hedged Global Fixed Income Portfolio may hedge the currency exposure of its foreign securities or leave some or all of the currency exposure unhedged. Each contract is valued daily and the change in value is recorded by the Portfolio as an unrealized gain or loss, which is presented in the Statements of Operations as the change in unrealized appreciation or depreciation of forward currency contracts. When the contract is closed or offset with the same counterparty, the Portfolio records a realized gain or loss equal to the change in the value of the contract when it was opened and the value at the time it was closed or offset. This is presented in the Statements of Operations as a net realized gain or loss on forward currency contracts. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currency relative to the U.S. dollar.
- 4. Swap Agreements: The Portfolios noted below may enter into inflation swap agreements to seek inflation protection. Inflation swap agreements are contracts in which one party agrees to pay the cumulative percentage increase in a price index (the Consumer Price Index with respect to CPI swaps) over the term of the swap (with some lag on the inflation index), and the other pays a compounded fixed rate. Inflation swap agreements may be used by the Portfolios to hedge the inflation risk in nominal bonds (i.e. non-inflation indexed bonds) thereby creating "synthetic" inflation-indexed bonds. Among other reasons, one factor that may lead to changes in the values of inflation swap agreements are changes in real interest rates. Real interest rates are tied to the relationship between nominal interest rates and the rate of inflation. If nominal interest rates increase at a faster rate than inflation, real

interest rates may rise, which may lead to a change in the value of an inflation swap agreement. Additionally, payments received by the Portfolios from inflation swap agreements will result in taxable income, either as ordinary income or capital gains, which will increase the amount of taxable distributions received by shareholders.

Most swap agreements entered into by the Portfolio will calculate the obligations of the parties to the agreement on a "net" basis, which means that the two payment streams are netted out, with the Portfolio receiving or paying, as the case may be, only the net amount of the two payments. The Portfolio's current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Portfolio) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the segregation of assets determined to be liquid to avoid any potential leveraging of the Portfolio's portfolio. To the extent that a Portfolio reasonably expects a swap cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment, the Portfolio will treat the swap as illiquid and subject to its overall limit on illiquid investments of 15% of the Portfolio's net assets. Inflation swap agreements are not currently subject to mandatory central clearing and exchange-trading.

Uncleared swaps are typically executed bilaterally with a swap dealer rather than traded on exchanges. Parties to uncleared swaps face greater counterparty credit risk than those engaging in cleared swaps since performance of uncleared swap obligations is the responsibility only of the swap counterparty rather than a clearing house, as is the case with cleared swaps. As a result, a Portfolio bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default, insolvency or bankruptcy of a swap agreement counterparty beyond any collateral received. In such an event, the Portfolio will have contractual remedies pursuant to the swap agreements, but bankruptcy and insolvency laws could affect the Portfolio's rights as a creditor.

5. Repurchase Agreements: The Portfolios may engage in repurchase agreement transactions with institutions that the Advisor has determined are creditworthy. The Portfolios, through their custodian, receive delivery of underlying securities collateralizing a repurchase agreement. Collateral for certain tri-party repurchase agreements is held at the counterparty's custodian in a segregated account for the benefit of the Portfolios and the counterparty. The counterparty will be required to maintain collateral with a value at least equal, at all times, to the value of the repurchase obligation including interest. A repurchase agreement transaction involves certain risks in the event of default or insolvency of the counterparty. These risks include possible delay or restrictions upon the Portfolios' ability to dispose of the collateral and a possible decline in the value of the collateral during the period while the Portfolios seek to assert its rights.

Repurchase agreements ("RA") permit the Portfolios, under certain circumstances including an event of default (such as bankruptcy or insolvency), to offset payables and/or receivables under the RA with collateral held and/or posted to the counterparty and create one single net payment due to or from the Portfolios. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against such a right of offset in the event of the RA counterparty's bankruptcy or insolvency. Pursuant to the terms of the RA, the Portfolios receive securities as collateral with a market value in excess of the repurchase price to be received by the Portfolios upon the maturity of the repurchase transaction. Upon a bankruptcy or insolvency of the RA counterparty, the Portfolios would recognize a liability with respect to such excess collateral to reflect the Portfolios' obligation under bankruptcy law to return the excess to the counterparty.

The average volume (based on the open positions at each fiscal month-end) of derivative activity for the year ended October 31, 2023 was as follows (amounts in thousands):

Offsetting of Derivative Assets and Derivative Liabilities:

In order to better define its contractual rights and to secure rights that will help the Fund mitigate its counterparty risk, the Fund entered into an International Swaps and Derivatives Association, Inc. Master Agreement (ISDA Master Agreement) or a similar agreement with certain of its derivative contract counterparties. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs over-the-counter (OTC) derivatives and forward currency contracts and typically contains, among other things, provisions in the event of a default and/or termination event and may also include collateral posting items. Under an ISDA Master Agreement, the Fund may, under certain circumstances, offset with the counterparty certain derivative financial instruments' payables and/or receivables with collateral held and/or posted, if any, and create one single net payment. The provisions of the ISDA Master Agreement typically permit a single net payment in the event of a default (close-out), including the bankruptcy or insolvency of the counterparty. However, bankruptcy or insolvency laws of a particular jurisdiction may impose restrictions on or prohibitions against the right of offset in bankruptcy, insolvency, or other events.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statements of Assets and Liabilities.

The Portfolios are subject to master netting agreements ("MNA") with certain counterparties that govern the terms of derivative transactions and reduce the counterparty risk associated with such transactions by specifying offsetting mechanisms and collateral posting arrangements at pre-arranged exposure levels. Since different types of transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different MNA, possibly resulting in the need for multiple agreements with a single counterparty. As the MNA's are specific to unique operations of different asset types, they allow each Portfolio to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single MNA with a counterparty. Certain MNA's contain provisions which allow for the net settlement of receivable and payable positions with the same counterparty if defined conditions are met.

The following table presents the Portfolios' gross and net amount of assets and liabilities available for offset under netting arrangements as well as any related collateral received or pledged by the Portfolios as of October 31, 2023 (amounts in thousands):

⁽a) No amounts have been netted against the gross amounts recognized in the Statements of Assets and Liabilities.

⁽b) Represents the amount of assets that could be offset by liabilities with the same counterparty under master netting or similar agreements that management elects not to offset on the Statements of Assets and Liabilities.

⁽c) Represents the net amount due from counterparties in the event of default.

⁽d) Represents the amount of liabilities that could be offset by assets with the same counterparty under master netting or similar agreements that management elects not to offset on the Statements of Assets and Liabilities.

⁽e) Represents the net amount due to counterparties in the event of default.

Note I contains information regarding securities lending amounts that are subject to netting arrangements.

H. Line of Credit and Interfund Lending Program:

The Fund, together with other Dimensional-advised portfolios, has entered into a \$500 million uncommitted, unsecured discretionary line of credit effective April 5, 2023, with its domestic custodian bank. A line of credit with similar terms was in effect through April 5, 2023. Each portfolio is permitted to borrow, subject to its investment limitations, up to a maximum of \$250 million, as long as total borrowings under the line of credit do not exceed \$500 million in the aggregate. Borrowings under the line of credit are charged interest at rates agreed upon by the parties at the time of borrowing. Each portfolio is individually, and not jointly, liable for its particular advances under the line of credit. There is no commitment fee on the unused portion of the line of credit. The agreement for the discretionary line of credit may be terminated by either party at any time. The agreement for the line of credit expires on April 3, 2024.

The Fund, together with other Dimensional-advised portfolios, has also entered into an additional \$700 million unsecured line of credit with its international custodian bank effective December 28, 2022. A line of credit with similar terms was in effect through December 28, 2022. Each portfolio is permitted to borrow, subject to its investment limitations, up to the lower of one-quarter of such portfolio's net assets or \$500 million, as long as total borrowings under the line of credit do not exceed \$700 million in the aggregate. Each portfolio is individually, and not jointly, liable for its particular advances under the line of credit. Borrowings under the line of credit are charged interest at rates agreed upon by the parties at the time of borrowing. There is no commitment fee on the unused portion of the line of credit. The line of credit agreement expires on December 27, 2023.

There were no borrowings by the Portfolios under the lines of credit during the year ended October 31, 2023.

Pursuant to an exemptive order issued by the SEC (the "Order"), the Portfolios may participate in an interfund lending program among certain portfolios managed by the Advisor. The program allows the participating portfolios to borrow money from and loan money to each other for temporary or emergency purposes, subject to the conditions in the Order. A loan can only be made through the program if the interfund loan rate on that day is more favorable to both the borrowing and lending portfolios as compared to rates available through short-term bank loans or investments in overnight repurchase agreements and money market funds, respectively, as detailed in the Order. Further, a portfolio may participate in the program only if and to the extent that such participation is consistent with its investment objectives and limitations. Interfund loans have a maximum duration of seven days and may be called on one business day's notice.

For the year ended October 31, 2023, activity by the Portfolios under the interfund lending program was as follows (amounts in thousands, except percentages and days):

| | Borrower or Lender | Weighted Average Interest Rate | Weighted Average Loan Balance | Number of Days Outstanding* | Interest Expense/ Income | Maximum Amount Borrowed/Loaned During the Period | Outstanding Borrowings as of 10/31/2023 |
|-------------|-----------------------|--------------------------------------|-------------------------------------|-----------------------------------|--------------------------------|--|---|
| DFA | | | | | | | |
| Diversified | | | | | | | |
| Fixed | | | | | | | |
| Income | | | | | | | |
| Portfolio | Borrower | 5.69% | \$73.814 | 1 | \$12 | \$73.814 | _ |

^{*} Number of Days Outstanding represents the total of single or consecutive days during the year ended October 31, 2023 that the Portfolio utilized the interfund lending program.

I. Securities Lending:

Each Portfolio with securities on loan invests the cash collateral, as described below, and records a liability for the return of the collateral, during the period the securities are on loan. Loans of securities are expected at all times to be secured by collateral in an amount (i) equal to at least 100% of the current market value of the loaned securities with respect to securities of the U.S. government or its agencies, (ii) generally equal to 102% of the current market value of the loaned securities with respect to U.S. securities, and (iii) generally equal to 105% of the current market

value of the loaned securities with respect to foreign securities. However, daily market fluctuations could cause the Portfolios' collateral to be lower or higher than the expected thresholds. If this were to occur, the collateral would be adjusted the next business day to ensure adequate collateralization. In the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings. If the borrower fails to return loaned securities, cash collateral being maintained by the borrower is insufficient to cover the value of loaned securities, and such collateral insufficiency is not the result of investment losses, the lending agent has agreed to pay the amount of the shortfall to the Portfolio or, at the option of the lending agent, to replace the securities. In the event of the bankruptcy of the borrower, the Portfolio could experience delay in recovering the loaned securities or only recover cash or a security of equivalent value.

Subject to their stated investment policies, each Portfolio with securities on loan will generally invest the cash collateral received for the loaned securities in the Money Market Series, an affiliated registered money market fund advised by the Advisor for which the Advisor receives a management fee of 0.05% of the average daily net assets of the Money Market Series. Income received from the Money Market Series is netted with fees for securities lending and collateral investment expenses and with other payments to and from borrowers of securities. Such Portfolios also may invest the cash collateral received for the loaned securities in securities of the U.S. government or its agencies, repurchase agreements collateralized by securities of the U.S. government or its agencies, and affiliated or unaffiliated money market funds that are registered or unregistered. For purposes of this paragraph, agencies include both agency debentures and agency mortgage-backed securities. Additionally, each Portfolio will be able to terminate the loan at any time and will receive reasonable interest on the loan, as well as amounts equal to any dividends, interest or, other distributions on the loaned securities. However, dividend income received from loaned securities may not be eligible for taxation at qualified dividend income rates.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type of collateral pledged, and the remaining contractual maturity of those transactions as of October 31, 2023 (amounts in thousands):

J. Indemnitees; Contractual Obligations:

Under the Fund's organizational documents, its Officers and Directors are indemnified against certain liabilities arising out of the performance of their duties to the Fund.

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties that provide general indemnification. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund and/or its affiliates that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

K. Recently Issued Accounting Standards and Regulations:

In March 2020, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2020-04, Reference Rate Reform (Topic 848) – Facilitation of the Effects of Reference Rate Reform on Financial Reporting. In January 2021, the FASB issued ASU No. 2021-01, with further amendments to Topic 848. The amendments in the ASUs provide optional temporary accounting recognition and financial reporting relief from the effect of certain types of contract modifications due to the planned discontinuation of the LIBOR and other interbank-offered based reference rates as of the end of 2021 and 2023. The ASUs were effective for certain reference rate-related contract modifications that occurred during the period March 12, 2020 through December 31, 2022. Management has reviewed the requirements and determined the adoption of these ASUs will not have a material impact on the Portfolios' financial statements.

In October 2022, the SEC adopted rule and form amendments requiring open-end management investment companies, including mutual funds and exchange-traded funds, to transmit concise and visually engaging semi-annual and annual reports that highlight key information, including fund expenses, performance, and holdings to shareholders. Other information, including financial statements, will no longer appear in the Portfolios' shareholder reports but will be available online, delivered free of charge upon request, and filed on a semi-annual basis on Form N-CSR. The rule and form amendments have a compliance date of July 24, 2024. Accordingly, the rule and form amendments will not impact the Portfolios until the 2024 annual shareholder reports, and will have no effect on the Portfolios' accounting policies or financial statements.

L. Other:

As of October 31, 2023, the following number of shareholders held the following approximate percentages of the Portfolios' outstanding shares. One or more of the shareholders may be omnibus accounts, which typically hold shares for the benefit of several other underlying investors.

| | Number of Shareholders | Approximate Percentage of Outstanding Shares |
|--|---------------------------|--|
| DFA One-Year Fixed Income Portfolio | 3 | 75% |
| DFA Two-Year Global Fixed Income Portfolio | 4 | 82% |

| | Number of Shareholders | Approximate Percentage of Outstanding Shares |
|--|---------------------------|---|
| DFA Selectively Hedged Global Fixed Income Portfolio | 2 | 83% |
| DFA Five-Year Global Fixed Income Portfolio | 2 | 80% |
| DFA World ex U.S. Government Fixed Income Portfolio | 4 | 85% |
| DFA Short-Term Government Portfolio | 4 | 90% |
| DFA Intermediate Government Fixed Income Portfolio | 3 | 85% |
| DFA Short-Term Extended Quality Portfolio | 3 | 80% |
| DFA Intermediate-Term Extended Quality Portfolio | 2 | 84% |
| DFA Targeted Credit Portfolio | 2 | 91% |
| DFA Global Core Plus Fixed Income Portfolio | 4 | 91% |
| DFA Investment Grade Portfolio | 3 | 79% |
| DFA Diversified Fixed Income Portfolio | 2 | 94% |
| DFA LTIP Portfolio | 8 | 91% |
| DFA Inflation-Protected Securities Portfolio. | 2 | 44% |
| DFA Short-Duration Real Return Portfolio | 3 | 83% |
| DFA Global Core Plus Real Return Portfolio | 2 | 93% |

The Portfolios are subject to claims and suits that arise from time to time in the ordinary course of business (for example, claw back litigation against former shareholders of portfolio companies that filed for bankruptcy, such as the now ended litigation involving The Tribune Company and the ongoing litigation involving Nine West). Although management currently believes that resolving claims against the Portfolios, individually or in aggregate, will not have a material adverse impact on the Portfolios' financial position, results of operations, or cash flows, these matters are subject to inherent uncertainties and management's view of these matters may change in the future.

M. Subsequent Event Evaluations:

Management has evaluated the impact of all subsequent events on the Portfolios through the date on which the financial statements were issued and has determined that there are no subsequent events requiring recognition or disclosure in the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Directors of DFA Investment Dimensions Group Inc. and Shareholders of each of the seventeen portfolios listed in the table below

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of each of the portfolios indicated in the table below (seventeen of the portfolios constituting DFA Investment Dimensions Group Inc., hereafter collectively referred to as the "Portfolios") as of October 31, 2023, the related statements of operations and of changes in net assets for each of the periods indicated in the table below, including the related notes, and the financial highlights for each of the periods indicated in the table below (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Portfolios as of October 31, 2023, the results of each of their operations, the changes in each of their net assets, and each of the financial highlights for each of the periods indicated in the table below, in conformity with accounting principles generally accepted in the United States of America.

| Portfolio | Statement of operations | Statement of changes in net assets | Financial highlights |

Basis for Opinions

These financial statements are the responsibility of the Portfolios' management. Our responsibility is to express an opinion on the Portfolios' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Portfolios in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

PricewaterhouseCoopers LLP, Two Commerce Square, Suite 1800, 2001 Market Street, Philadelphia, PA 19103-7042 T: (267) 330-3000, www.pwc.com/us

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2023 by correspondence with the custodians, brokers and transfer agents of the investee funds; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

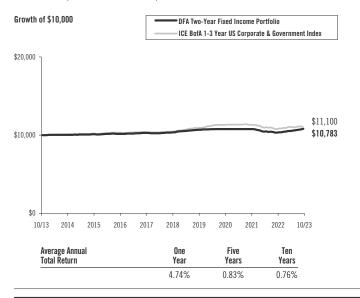

/s/PricewaterhouseCoopers LLP Philadelphia, Pennsylvania December 21, 2023

We have served as the auditor of one or more investment companies in Dimensional Fund Advisors L.P. investment company group since 1981.

The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares.

ICE BofA index data copyright 2023 ICE Data Indices, LLC. Prior to July 1, 2022, index returns reflect no deduction for transaction costs. Effective July 1, 2022, index returns include transaction costs (as determined and calculated by the index provider), which may be higher or lower than the actual transaction costs incurred by the Portfolio.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Fixed Income Market Review

12 Months Ended October 31, 2023

Bond yields generally increased in the U.S. during the 12 months ended October 31, 2023. Longer-term government bonds generally underperformed shorter-term government bonds for the period. Bond yields also generally increased across global developed markets, resulting in the general underperformance of longer-term government bonds across global developed markets as well.

Long-term bond indices generally underperformed short-term bond indices in global developed fixed income markets for the 12 months ended October 31, 2023. For example, the Bloomberg Global Treasury Bond Index 1-3 Years (hedged to USD) returned 3.63%, while the Bloomberg Global Treasury Bond Index 10+ Years (hedged to USD) returned -4.02%. Within the U.S., the Bloomberg U.S. Treasury Bond Index 1-3 Years returned 2.89%, while the Bloomberg U.S. Treasury Bond Index 10+ Years returned -8.50%.

| | October 31, 2022 | October 31, 2023 | <u>Change</u> |
|--------------------------------------|------------------|------------------|---------------|
| One-Month Treasury Bill (yield) | . 3.73% | 5.56% | 1.83% |
| Ten-Year U.S. Treasury Notes (yield) | 4.10% | 4.88% | 0.78% |

Source: Bloomberg

Many of Dimensional's fixed income strategies use a variable maturity approach that identifies a maturity range with higher expected returns. When the yield curve is flat or inverted, short-term securities are believed to offer higher expected returns. When the yield curve is upwardly sloped, portfolio maturities may be lengthened to seek the higher expected returns associated with longer maturities. These higher returns may be achieved by capital appreciation (from holding bonds through an upwardly sloped term structure) as well as by earning higher current yields.

During the period under review, within the taxable bond market, the ultrashort- and short-term Portfolios employing a variable maturity approach were generally positioned toward the shorter end of their eligible maturity ranges as short-term bonds generally exhibited higher expected returns, reflecting a generally flat to inverted ultrashort- to short-term segment of eligible yield curves. The intermediate-term Portfolios employing a variable maturity approach focused on a combination of short- and long-term securities as certain eligible yield curves were generally flat to inverted in their short-term segments but were slightly upwardly sloped in their intermediate- to long-term segments. Realized term premiums were negative during the period.

Some of Dimensional's fixed income strategies use a variable credit approach that varies exposure to lower credit quality securities. When credit spreads are narrow, higher-quality securities are emphasized. When credit spreads are wide, additional credit exposure may be taken in order to position a Portfolio to seek higher expected returns by capturing higher expected credit premiums.

Credit spreads were relatively wide over the period, indicating larger expected credit premiums. As a result, the variable credit Portfolios generally maintained their allocations to single-A, BBB, and where allowable and appropriate, BB rated bonds during the period, but were generally below

their maximum allowable weights. Realized credit premiums were positive, as corporate bonds outperformed their government bond counterparts. Both corporate and government bonds outperformed securitized bonds during the period.

For the tax-exempt market, Portfolios employing a variable maturity approach generally focused on the shorter-end of their eligible duration ranges, reflecting the relatively flat slope of eligible municipal curves during the period. Realized term premiums were mixed for municipal securities during the period, with intermediate-term municipal bonds generally underperforming shorter- and longer-term municipal bonds.

DFA Two-Year Fixed Income Portfolio

The DFA Two-Year Fixed Income Portfolio is designed to maximize total returns consistent with preservation of capital by investing in high-quality fixed income securities maturing in three years or less. The weighted average maturity of the Portfolio will not exceed two years. The investment strategy uses a variable maturity approach and shifts maturities based on changes in the yield curve. The strategy uses current yields and identifies favorable maturity ranges of expected returns based on potential buy and sell strategies. Maturity targets are shifted based on Dimensional's expectations for term premiums. The weighted average duration of the Portfolio was 0.21 year as of October 31, 2023, compared to 1.22 years as of October 31, 2023, compared to 1.84 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 4.74% for the Portfolio and 3.30% for the ICE BofA 1-3 Year U.S. Corporate & Government Index, the Portfolio's benchmark. At the beginning of the period, the U.S. Treasury yield curve was generally upwardly sloped along the Portfolio's eligible maturity segment. However, during the period, the yield curve fully inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased to the shorter end of its eligible range. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year, and underweight to longer-term securities, contributed positively to relative performance.

DFA Two-Year Government Portfolio

The DFA Two-Year Government Portfolio is designed to maximize total returns consistent with preservation of capital by investing in securities of the U.S. government and its agencies maturing in three years or less (under normal circumstances, the Portfolio will invest at least 80% of its net assets in fixed income securities that mature within two years). The Portfolio also maintains an average portfolio maturity of two years or less. The investment strategy uses a variable maturity approach and shifts maturities based on changes in the yield curve. The strategy uses current yields and identifies favorable maturity ranges of expected returns based on potential buy and sell strategies. Maturity targets are shifted based on Dimensional's expectations for term premiums. The weighted average duration of the Portfolio was 0.14 year as of October 31, 2023, compared to 1.03 years as of October 31, 2022. The weighted average duration of the benchmark was 1.80 years as of October 31, 2023, compared to 1.81 years as of October 31, 2022.

For the 12 months ended October 31, 2023, total returns were 4.92% for the Portfolio and 2.94% for the ICE BofA 1-3 Year U.S. Treasury & Agency Index, the Portfolio's benchmark. At the

beginning of the period, the U.S. Treasury yield curve was generally upwardly sloped along the Portfolio's eligible maturity segment. However, during the period, the yield curve fully inverted, indicating smaller expected term premiums. As such, the Portfolio's duration was decreased to the shorter end of its eligible range. Realized term premiums were generally negative during the period. As a result, the Portfolio's allocation to securities with maturities shorter than one-year, and underweight to longer-term securities, contributed positively to relative performance.

DISCLOSURE OF FUND EXPENSES

(Unaudited)

The following Expense Tables are shown so that you can understand the impact of fees on your investment. All mutual funds have operating expenses. As a shareholder of the fund, you incur ongoing costs, which include costs for portfolio management, administrative services, and shareholder reports, among others. Operating expenses and legal and audit services, which are deducted from a fund's gross income, directly reduce the investment return of the fund. A fund's expenses are expressed as a percentage of its average net assets. This figure is known as the expense ratio. The following examples are intended to help you understand the ongoing costs, in dollars, of investing in the fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period.

The Expense Tables below illustrate your fund's costs in two ways.

Actual Fund Return

This section helps you to estimate the actual expenses after fee waivers that you paid over the period. The "Ending Account Value" shown is derived from the fund's actual return, and "Expenses Paid During Period" reflects the dollar amount that would have been paid by an investor who started with \$1,000 in the fund. You may use the information here, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number given for your fund under the heading "Expenses Paid During Period."

Hypothetical Example for Comparison Purposes

This section is intended to help you compare your fund's costs with those of other mutual funds. The hypothetical "Ending Account Value" and "Expenses Paid During Period" are derived from the fund's actual expense ratio and an assumed 5% annual return before expenses. In this case, because the return used is not the fund's actual return, the results do not apply to your investment. The example is useful in making comparisons because the SEC requires all mutual funds to calculate expenses based on a 5% annual return. You can assess your fund's costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight and help you compare ongoing costs only and do not reflect any transactional costs, if applicable. The "Annualized Expense Ratio" represents the actual expenses for the six-month period indicated.

Six Months Ended October 31, 2023

EXPENSE TABLES

| | Beginning Account Value 05/01/23 | Ending Account Value 10/31/23 | Annualized Expense Ratio (1) | Expenses Paid During Period (1) |
|-------------------------------------|---|--|------------------------------------|---------------------------------|
| DFA Two-Year Fixed Income Portfolio | | | | |
| Actual Fund Return | \$1,000.00 | \$1,024.30 | 0.21% | \$1.07 |
| Hypothetical 5% Annual Return | \$1,000.00 | \$1,024.15 | 0.21% | \$1.07 |
| DFA Two-Year Government Portfolio | | | | |
| Actual Fund Return | \$1,000.00 | \$1,025.70 | 0.17% | \$0.87 |

DISCLOSURE OF FUND EXPENSES CONTINUED

| | Beginning Account Value 05/01/23 | Ending Account Value 10/31/23 | Annualized Expense Ratio (1) | Expenses Paid During Period (1) |
|-------------------------------|---|--|------------------------------------|--|
| Hypothetical 5% Annual Return | \$1,000.00 | \$1,024.35 | 0.17% | \$0.87 |

⁽¹⁾ Expenses are equal to the fund's annualized expense ratio for the six-month period, multiplied by the average account value over the period, multiplied by the number of days in the most recent six-month period (184), then divided by the number of days in the year (365) to reflect the six-month period.

DIMENSIONAL INVESTMENT GROUP INC. DISCLOSURE OF PORTFOLIO HOLDINGS

(Unaudited)

The SEC requires that all funds file a complete Schedule of Investments with the SEC for their first and third fiscal quarters as an exhibit to their reports on Form N-PORT. For Dimensional Investment Group Inc., this would be for the fiscal quarters ending January 31 and July 31. Such Form N-PORT filing must be made within 60 days of the end of the quarter. Dimensional Investment Group Inc. filed its most recent Form N-PORT with the SEC on October 19, 2023. They are available upon request, without charge, by calling collect: (512) 306-7400; by mailing a request to Dimensional Fund Advisors LP, 6300 Bee Cave Road, Building One, Austin, TX 78746; or by visiting the SEC's website at http://www.sec.gov.

PORTFOLIO HOLDINGS

The SEC requires that all funds present their categories of portfolio holdings in a table, chart, or graph format in their annual and semi-annual shareholder reports, whether or not a Schedule of Investments is used. The following tables, which present portfolio holdings as a percentage of total investments before short-term investments and collateral for loaned securities, are provided in compliance with this requirement. The categories shown below represent broad industry sectors. Each industry sector consists of one or more specific industry classifications.

DIMENSIONAL INVESTMENT GROUP INC. NOTES TO FINANCIAL STATEMENTS

A. Organization:

Dimensional Investment Group Inc. (the "Fund") is an open-end management investment company registered under the Investment Company Act of 1940 (the "1940 Act"), whose shares are generally offered to institutional investors, retirement plans and clients of registered investment advisors. The Fund consists of ten portfolios, two of which, DFA Two-Year Fixed Income Portfolio and DFA Two-Year Government Portfolio (the "Portfolios") are presented in this report. The remaining operational portfolios are presented in separate reports. The Portfolios are investment companies, and accordingly, follow the accounting and reporting guidance under the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"), Topic 946, "Financial Services-Investment Companies."

B. Significant Accounting Policies:

The following significant accounting policies are in conformity with accounting principles generally accepted in the United States of America ("GAAP"). Such policies are consistently followed by the Fund in preparation of its financial statements. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the fair value of investments, the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates, and those differences could be material.

- 1. Security Valuation: The Portfolios use a fair value hierarchy, which prioritizes the inputs-to-valuation techniques used to measure fair value into three broad levels described below:
 - Level 1 inputs are quoted prices in active markets for identical securities (including equity securities, open-end investment companies, and futures contracts)
 - Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
 - Level 3 significant unobservable inputs (including the Portfolios' own assumptions in determining the fair value of investments)

Debt securities held by the Portfolios are valued on the basis of evaluated prices provided by one or more pricing services or other reasonably reliable sources including broker/dealers that typically handle the purchase and sale of such securities. Securities that are traded over-the-counter and on a stock exchange generally will be valued according to the broadest and most representative market, and it is expected that for bonds and other fixed income securities, this ordinarily will be the over-the-counter market. Securities for which quotations are not readily available (including restricted securities), or for which market quotations have become unreliable, are valued in good faith at fair value in accordance with Rule 2a-5 under the 1940 Act pursuant to procedures approved by the Board of Directors of the Fund. Fair value pricing may also be used if events that have a significant effect on the value of an investment (as determined in the discretion of Dimensional Fund Advisors LP) occur before the net asset value of the Portfolio is calculated. When fair value pricing is used, the prices of securities used by the Portfolios may differ from the quoted or published prices for the same securities on their primary markets or exchanges. These securities are generally categorized as Level 2 or Level 3 in the hierarchy.

A summary of the inputs used to value the Portfolios' investments by each major security type, industry and/or country is disclosed previously in this note. Valuation hierarchy tables have been included at the end of the Schedules of Investments. The methodology or inputs used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

2. Deferred Compensation Plan: Each eligible Director of the Fund may elect to participate in the Fee Deferral Plan for Independent Directors and Trustees (the "Plan"). Under the Plan, effective January 1, 2002, such Directors may defer payment of all or a portion of their total fees earned as a Director. These deferred amounts may be treated

as though such amounts had been invested in shares of the following funds: the U.S. Large Cap Value Portfolio, U.S. Core Equity 1 Portfolio, U.S. Large Company Portfolio, U.S. Vector Equity Portfolio, U.S. Micro Cap Portfolio, DFA International Value Portfolio, International Core Equity Portfolio, Emerging Markets Portfolio, DFA Inflation-Protected Securities Portfolio, and/or DFA Two-Year Global Fixed Income Portfolio. Contributions made under the Plan and the change in unrealized appreciation (depreciation) and income are included in Directors'/ Trustees' Fees & Expenses.

The Directors may receive their distributions of proceeds by one of the following methods: lump sum, annual installments over a period of agreed-upon years, or quarterly installments over a period of agreed-upon years. Each Director shall have the right in a notice of election (the "Notice") to defer the receipt of the Director's deferred compensation until a date specified by such Director in the Notice. The date may not be sooner than the earlier of: (i) the first business day of January following the year in which such Director ceases to be a member of the Board of Directors of the Fund; and (ii) five years following the effective date of the Director's first deferral election. If a Director who elects to defer fees fails to designate in the Notice a time or date as of which payment of the Director's deferred fee account shall commence, payment of such amount shall commence as of the first business day of January following the year in which the Director ceases to be a member of the Board (unless the Director files an amended Notice selecting a different distribution date).

C. Investment Advisor:

The Advisor, Dimensional Fund Advisors LP, provides investment management services to the Portfolios. For the year ended October 31, 2023, the Portfolios' investment management fees were accrued daily and paid monthly to the Advisor based on the following effective annual rates of average daily net assets:

| DFA Two-Year Fixed Income Portfolio | 0.14% |
|-------------------------------------|-------|
| DFA Two-Year Government Portfolio. | 0.10% |

Pursuant to Fee Waiver and/or Expense Assumption Agreements (each, a "Fee Waiver Agreement"), the Advisor has contractually agreed to waive certain fees, and in certain instances, assume certain expenses of the Portfolios, as described below. The Fee Waiver Agreement for the Portfolios will remain in effect through February 28, 2024, may only be terminated by the Fund's Board of Directors prior to that date and shall continue in effect from year to year thereafter unless terminated by the Fund or the Advisor. During the year ended October 31, 2023, the Portfolios had expense limits based on a percentage of average net assets on an annualized basis, and the Advisor recovered previously waived fees and/or assumed expenses (amounts in thousands), as listed below. The net amount of waived fees/expenses assumed (recovered previously waived fees/expenses assumed) during the year ended October 31, 2023, and the previously waived fees/expenses assumed subject to future recovery by the Advisor as of October 31, 2023, are also reflected below (amounts in thousands). At any time that the Portfolio Expenses (defined below) of the Institutional Class of a Portfolio are less than the Expense Limitation Amount listed below, the Advisor retains the right to recover fees previously waived and/or expenses previously assumed to the extent that the expense ratio following such recovery would be less than the Expense Limitation Amount that was in place when such prior year fees were waived and/or expenses assumed, and less than the current Expense Limitation Amount in place for the Portfolio. The Fund, on behalf of the Portfolios, is not obligated to reimburse the Advisor for fees previously waived or expenses previously assumed by the Advisor more than thirty-six months before the date of recovery.

| Institutional Class Shares | Expense Limitation Amount | Recovery of Previously Waived Fees/ Expenses Assumed | Waived Fees/ Expenses Assumed | Waived Fees/ Expenses Assumed Subject to Future Recovery |
|---|---------------------------------|---|-------------------------------------|--|
| DFA Two-Year Fixed Income Portfolio (1) | 0.21% | \$ 2 | \$8 | \$30 |
| DFA Two-Year Government Portfolio (1) | 0.17% | _ | 6 | 7 |

⁽¹⁾ The Advisor has contractually agreed to waive all or a portion of its management fee and assume the ordinary operating expenses of a class of a Portfolio (excluding the expenses that the Portfolio incurs indirectly through its investment in other investment companies) ("Portfolio Expenses") to the extent necessary to limit the Portfolio Expenses of a class of the Portfolio, on an annualized basis, to the rates listed above

as a percentage of a class of the Portfolio's average net assets (the "Expense Limitation Amount"). Prior to February 28, 2022, the Expense Limitation Amount for the DFA Two-Year Government Portfolio was 0.20%.

Fees Paid to Officers and Directors/Trustees:

Certain Officers and Directors of the Advisor are also Officers and Directors of the Fund; however, such Officers and Directors (with the exception of the Chief Compliance Officer ("CCO")) receive no compensation from the Fund. For the year ended October 31, 2023, the total related amount paid by the Fund to the CCO was \$18 (in thousands). The total related amounts paid by each of the Portfolios are included in Other Expenses on the Statements of Operations.

D. Deferred Compensation:

As of October 31, 2023, the total liability for deferred compensation to Directors is included in Accrued Expenses and Other Liabilities on the Statements of Assets and Liabilities as follows (amounts in thousands):

| DFA Two-Year Fixed Income Portfolio | \$2 |
|-------------------------------------|-----|
| DFA Two-Year Government Portfolio. | 4 |

E. Purchases and Sales of Securities:

For the year ended October 31, 2023, the Portfolios made the following purchases and sales of investment securities, other than short-term securities and in-kind redemptions (amounts in thousands):

| | U.S. Governm | ent Securities | Other Investme | ent Securities |
|-------------------------------------|--------------|----------------|----------------|----------------|
| | Purchases | Sales | Purchases | Sales |
| DFA Two-Year Fixed Income Portfolio | \$35,121 | \$ 57,979 | \$16,022 | \$34,761 |
| DFA Two-Year Government Portfolio | 93,087 | 191,089 | _ | |

For the year ended October 31, 2023, transactions related to Affiliated Investment Companies, excluding in-kind redemptions, are presented below.

The amounts presented below may differ from the respective amounts presented in the corresponding Schedules of Investments, Statements of Assets and Liabilities or Statements of Operations due to rounding. The amounts are as follows (amounts in thousands):

| | Balance at October 31, 2022 | | Proceeds from Sales | , , | Appreciation/ | Balance at October 31, 2023 | Shares as of October 31, 2023 | | Capital Gain Distributions |
|--|--------------------------------|----------|---------------------|-----|---------------|--------------------------------|----------------------------------|------|-------------------------------|
| DFA Two-Year Fixed Income Portfolio The DFA Short Term | | | | | | | | | |
| Investment Fund | \$886 | \$45,870 | \$46,446 | \$1 | | \$311 | 27 | \$91 | |
| Total | \$886 | \$45,870 | \$46,446 | \$1 | | \$311 | 27 | \$91 | |

F. Federal Income Taxes:

Each Portfolio has qualified and intends to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code for federal income tax purposes and to distribute substantially all of its taxable income and net capital gains to its shareholders. Accordingly, no provision has been made for federal income taxes.

Distributions from net investment income and net realized capital gains are determined in accordance with U.S. federal income tax regulations, which may differ from those amounts determined under GAAP. These book/tax differences are either temporary or permanent in nature. To the extent that these differences are permanent, they are

charged or credited to paid-in capital or distributable earnings, undistributed net investment income, accumulated net realized gains or losses, or unrealized appreciation, as appropriate, in the period that the differences arise. Accordingly, the permanent differences as of October 31, 2023, can occur as a result of realized gains on securities considered to be "passive foreign investment companies," non-deductible expenses, realized foreign capital gains tax, net foreign currency gains/losses, the use of accumulated earnings and profits distributed to shareholders on redemptions of shares as part of the dividends paid deduction for income tax purposes, distributions received from real estate investment trusts and distribution redesignations, and bond amortization, and were reclassified to the accounts mentioned above. These reclassifications had no effect on net assets or net asset value per share.

The tax character of dividends and distributions declared and paid during the years ended October 31, 2022, and October 31, 2023, were as follows (amounts in thousands):

| | Net Investment Income and Short-Term Capital Gains | Long-Term Capital Gains | Tax Exempt Income | Total |
|-------------------------------------|---|----------------------------|----------------------|---------|
| DFA Two-Year Fixed Income Portfolio | | | | |
| 2022 | \$1,088 | _ | _ | \$1,088 |
| 2023 | 3,657 | _ | _ | 3,657 |
| DFA Two-Year Government Portfolio | | | | |
| 2022 | 1,120 | _ | _ | 1,120 |
| 2023 | 3,419 | _ | _ | 3,419 |

As of October 31, 2023, the following net investment income and short-term capital gains and long-term capital gains distributions designated for federal income tax purposes are due to the use of accumulated earnings and profits distributed to shareholders upon redemption of shares (amounts in thousands):

| | Net Investment Income and Short-Term Capital Gains | Long-Term Capital Gains | Total |
|-------------------------------------|---|----------------------------|---------|
| DFA Two-Year Fixed Income Portfolio | \$(423) | _ | \$(423) |
| DFA Two-Year Government Portfolio | (236) | _ | (236) |

As of October 31, 2023, the components of distributable earnings (accumulated losses) were as follows (amounts in thousands):

| | Undistributed Net Investment Income and Short-Term Capital Gains | Undistributed Long-Term Capital Gains | Capital Loss Carryforwards | Unrealized Appreciation (Depreciation) | Total Net Distributable Earnings (Accumulated Losses) |
|-------------------------------------|--|---|-------------------------------|--|---|
| DFA Two-Year Fixed Income Portfolio | \$326 | _ | \$(4,427) | \$(446) | \$(4,547) |
| DFA Two-Year Government Portfolio | 509 | _ | (6,662) | 51 | (6,102) |

For federal income tax purposes, the Fund measures its capital loss carryforwards annually at October 31, its fiscal year end. Capital loss carryforwards may be carried forward and applied against future capital gains. As of October 31, 2023, the Portfolios had the following capital loss carryforwards available to offset future realized capital gains with no expiration date (amounts in thousands):

| | Unlimited | Total |
|-------------------------------------|-----------|---------|
| DFA Two-Year Fixed Income Portfolio | \$4,427 | \$4,427 |
| DFA Two-Year Government Portfolio | 6,662 | 6,662 |

During the year ended October 31, 2023, the Portfolios did not use capital loss carryforwards to offset realized capital gains for federal income tax purposes.

As of October 31, 2023, the total cost and aggregate gross unrealized appreciation (depreciation) of securities for federal income tax purposes were different from amounts reported for financial reporting purposes, as follows (amounts in thousands):

| | Federal Tax Cost | Unrealized Appreciation | Unrealized (Depreciation) | Unrealized Appreciation (Depreciation) |
|-------------------------------------|---------------------|----------------------------|------------------------------|--|
| DFA Two-Year Fixed Income Portfolio | \$131,470 | \$38 | \$(485) | \$(447) |
| DFA Two-Year Government Portfolio | 148,723 | 87 | (36) | 51 |

The difference between GAAP-basis and tax-basis unrealized gains (losses) can occur as a result of wash sales and net mark-to-market gains (losses) on regulated futures contracts, net mark-to-market gains (losses) on foreign currency contracts, and differences in the tax treatment of passive foreign investment company investments or other investments.

ASC 740 Accounting for Uncertainty in Income Taxes sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Management has analyzed the Portfolios' tax positions and has concluded that no additional provision for income tax is required in the Portfolios' financial statements. The Portfolios are not aware of any tax positions for which it is more likely than not that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Portfolios' federal tax returns for the prior three fiscal years remain subject to examination by the Internal Revenue Service.

G. Line of Credit and Interfund Lending Program:

The Fund, together with other Dimensional-advised portfolios, has entered into a \$500 million uncommitted, unsecured discretionary line of credit effective April 5, 2023, with its domestic custodian bank. A line of credit with similar terms was in effect through April 5, 2023. Each portfolio is permitted to borrow, subject to its investment limitations, up to a maximum of \$250 million, as long as total borrowings under the line of credit do not exceed \$500 million in the aggregate. Borrowings under the line of credit are charged interest at rates agreed upon by the parties at the time of borrowing. Each portfolio is individually, and not jointly, liable for its particular advances under the line of credit. There is no commitment fee on the unused portion of the line of credit. The agreement for the discretionary line of credit may be terminated by either party at any time. The agreement for the line of credit expires on April 3, 2024.

The Fund, together with other Dimensional-advised portfolios, has also entered into an additional \$700 million unsecured line of credit with its international custodian bank effective December 28, 2022. A line of credit with similar terms was in effect through December 28, 2022. Each portfolio is permitted to borrow, subject to its investment limitations, up to the lower of one-quarter of such portfolio's net assets or \$500 million, as long as total borrowings under the line of credit do not exceed \$700 million in the aggregate. Each portfolio is individually, and not jointly, liable for its particular advances under the line of credit. Borrowings under the line of credit are charged interest at rates agreed upon by the parties at the time of borrowing. There is no commitment fee on the unused portion of the line of credit. The line of credit agreement expires on December 27, 2023.

There were no borrowings by the Portfolios under the lines of credit during the year ended October 31, 2023.

Pursuant to an exemptive order issued by the SEC (the "Order"), the Portfolios may participate in an interfund lending program among certain portfolios managed by the Advisor. The program allows the participating portfolios to borrow money from and loan money to each other for temporary or emergency purposes, subject to the conditions in the Order. A loan can only be made through the program if the interfund loan rate on that day is more favorable to both the borrowing and lending portfolios as compared to rates available through short-term bank loans or investments in overnight repurchase agreements and money market funds, respectively, as detailed in the Order.

Further, a portfolio may participate in the program only if and to the extent that such participation is consistent with its investment objectives and limitations. Interfund loans have a maximum duration of seven days and may be called on one business day's notice.

The Portfolios did not use the interfund lending program during the year ended October 31, 2023.

H. Securities Lending:

Each Portfolio with securities on loan invests the cash collateral, as described below, and records a liability for the return of the collateral, during the period the securities are on loan. Loans of securities are expected at all times to be secured by collateral in an amount (i) equal to at least 100% of the current market value of the loaned securities with respect to securities of the U.S. government or its agencies, (ii) generally equal to 102% of the current market value of the loaned securities with respect to U.S. securities, and (iii) generally equal to 105% of the current market value of the loaned securities with respect to foreign securities. However, daily market fluctuations could cause the Portfolios' collateral to be lower or higher than the expected thresholds. If this were to occur, the collateral would be adjusted the next business day to ensure adequate collateralization. In the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings. If the borrower fails to return loaned securities, cash collateral being maintained by the borrower is insufficient to cover the value of loaned securities, and such collateral insufficiency is not the result of investment losses, the lending agent has agreed to pay the amount of the shortfall to the Portfolio or, at the option of the lending agent, to replace the securities. In the event of the bankruptcy of the borrower, the Portfolio could experience delay in recovering the loaned securities or only recover cash or a security of equivalent value.

Subject to their stated investment policies, each Portfolio with securities on loan will generally invest the cash collateral received for the loaned securities in the Money Market Series, an affiliated registered money market fund advised by the Advisor for which the Advisor receives a management fee of 0.05% of the average daily net assets of the Money Market Series. Income received from the Money Market Series is netted with fees for securities lending and collateral investment expenses and with other payments to and from borrowers of securities. Such Portfolios also may invest the cash collateral received for the loaned securities in securities of the U.S. government or its agencies, repurchase agreements collateralized by securities of the U.S. government or its agencies, and affiliated or unaffiliated money market funds that are registered or unregistered. For purposes of this paragraph, agencies include both agency debentures and agency mortgage-backed securities. Additionally, each Portfolio will be able to terminate the loan at any time and will receive reasonable interest on the loan, as well as amounts equal to any dividends, interest or, other distributions on the loaned securities. However, dividend income received from loaned securities may not be eligible for taxation at qualified dividend income rates.

The following table reflects a breakdown of transactions accounted for as secured borrowings, the gross obligation by the type of collateral pledged, and the remaining contractual maturity of those transactions as of October 31, 2023 (amounts in thousands):

| | Remaining Contractual Maturity of the Agreements As of October 31, 2023 | | | | | | | | |
|-------------------------------------|---|----------|-------------------------|----------|-------|--|--|--|--|
| | Overnight and Continuous | <30 days | Between 30 & 90 days | >90 days | Total | | | | |
| Securities Lending Transactions | | | | | | | | | |
| DFA Two-Year Fixed Income Portfolio | | | | | | | | | |
| Bonds, U.S. Treasury Obligations | \$311 | | _ | | \$311 | | | | |

I. Indemnitees; Contractual Obligations:

Under the Fund's organizational documents, its Officers and Directors are indemnified against certain liabilities arising out of the performance of their duties to the Fund.

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties that provide general indemnification. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund and/or its affiliates that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

J. Recently Issued Accounting Standards and Regulations:

In March 2020, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2020-04, Reference Rate Reform (Topic 848) – Facilitation of the Effects of Reference Rate Reform on Financial Reporting. In January 2021, the FASB issued ASU No. 2021-01, with further amendments to Topic 848. The amendments in the ASUs provide optional temporary accounting recognition and financial reporting relief from the effect of certain types of contract modifications due to the planned discontinuation of the LIBOR and other interbank-offered based reference rates as of the end of 2021 and 2023. The ASUs were effective for certain reference rate-related contract modifications that occurred during the period March 12, 2020 through December 31, 2022. Management has reviewed the requirements and determined the adoption of these ASUs will not have a material impact on the Portfolios' financial statements.

In October 2022, the SEC adopted rule and form amendments requiring open-end management investment companies, including mutual funds and exchange-traded funds, to transmit concise and visually engaging semi-annual and annual reports that highlight key information, including fund expenses, performance, and holdings to shareholders. Other information, including financial statements, will no longer appear in the Portfolios' shareholder reports but will be available online, delivered free of charge upon request, and filed on a semi-annual basis on Form N-CSR. The rule and form amendments have a compliance date of July 24, 2024. Accordingly, the rule and form amendments will not impact the Portfolios until the 2024 annual shareholder reports, and will have no effect on the Portfolios' accounting policies or financial statements.

K. Other:

As of October 31, 2023, the following number of shareholders held the following approximate percentages of the Portfolios' outstanding shares. One or more of the shareholders may be omnibus accounts, which typically hold shares for the benefit of several other underlying investors.

| | Number of Shareholders | Approximate Percentage of Outstanding Shares |
|-------------------------------------|------------------------|--|
| DFA Two-Year Fixed Income Portfolio | 3 | 95% |
| DFA Two-Year Government Portfolio | 3 | 98% |

The Portfolios are subject to claims and suits that arise from time to time in the ordinary course of business (for example, claw back litigation against former shareholders of portfolio companies that filed for bankruptcy, such as the now ended litigation involving The Tribune Company and the ongoing litigation involving Nine West). Although management currently believes that resolving claims against the Portfolios, individually or in aggregate, will not have a material adverse impact on the Portfolios' financial position, results of operations, or cash flows, these matters are subject to inherent uncertainties and management's view of these matters may change in the future.

L. Subsequent Event Evaluations:

Management has evaluated the impact of all subsequent events on the Portfolios through the date on which the financial statements were issued and has determined that there are no subsequent events requiring recognition or disclosure in the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Directors of Dimensional Investment Group Inc. and Shareholders of DFA Two-Year Fixed Income Portfolio and DFA Two-Year Government Portfolio

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of DFA Two-Year Fixed Income Portfolio and DFA Two-Year Government Portfolio (two of the portfolios constituting Dimensional Investment Group Inc., hereafter collectively referred to as the "Portfolios") as of October 31, 2023, the related statements of operations for the year ended October 31, 2023, the statements of changes in net assets for each of the two years in the period ended October 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended October 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Portfolios as of October 31, 2023, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended October 31, 2023, and each of the financial highlights for each of the five years in the period ended October 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinions

These financial statements are the responsibility of the Portfolios' management. Our responsibility is to express an opinion on the Portfolios' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Portfolios in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of October 31, 2023 by correspondence with the custodian, brokers and transfer agent of the investee fund; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/PricewaterhouseCoopers LLP Philadelphia, Pennsylvania December 21, 2023

We have served as the auditor of one or more investment companies in Dimensional Fund Advisors L.P. investment company group since 1981.

FUND MANAGEMENT

(Unaudited)

Trustees/Directors

Each Board of Trustees/Directors (each, the "Board" and collectively, the "Boards") of The DFA Investment Trust Company ("DFAITC"), DFA Investment Dimensions Group Inc. ("DFAIDG"), Dimensional Investment Group Inc. ("DIG"), Dimensional ETF Trust ("ETF Trust"), and Dimensional Emerging Markets Value Fund ("DEM") (each, a "Fund" and collectively, the "Funds") is responsible for establishing the Funds' policies and for overseeing the management of the Funds. The Trustees/Directors of the Funds, including all of the disinterested Trustees/Directors, have adopted written procedures to monitor potential conflicts of interest that might develop between portfolios of the Funds (the "Feeder Portfolios") that invest in certain series of DFAITC or DEM (the "Master Funds").

Each Board has four standing committees, an Audit Committee, a Nominating and Governance Committee (the "Nominating Committee"), a Mutual Funds-ETF Relations committee and an Investment Strategy Committee (the "Strategy Committee"). The Audit Committee is composed of Reena Aggarwal, George M. Constantinides, Francis A. Longstaff, Abbie J. Smith and Ingrid M. Werner. Each member of the Audit Committee is a disinterested Trustee/Director. The Audit Committee oversees the Fund's accounting and financial reporting policies and practices, the Fund's internal controls, the Fund's financial statements and the independent audits thereof and performs other oversight functions as requested by the Board. The Audit Committee recommends the appointment of each Fund's independent registered certified public accounting firm and acts as a liaison between the Fund's independent registered certified public accounting firm and the full Board. There were three Audit Committee meetings held during the fiscal year ended October 31, 2023.

Each Board's Nominating Committee is composed of Reena Aggarwal, George M. Constantinides, Douglas W. Diamond, Francis A. Longstaff, and Heather E. Tookes. Each member of the Nominating Committee is a disinterested Trustee/Director. The Nominating Committee for each Board makes recommendations for nominations of disinterested and interested members on the Board to the disinterested Board members and to the full Board. The Nominating Committee works closely with the other disinterested Trustees to evaluate a candidate's qualification for Board membership and the independence of such candidate from the Advisor and other principal service providers. The Nominating Committee also periodically reviews the Board governance practices, policies, procedures, and operations; reviews the membership of each committee of the Board; reviews and makes recommendations regarding the Independent Trustees' compensation; oversees the annual self-assessment of the Board and each committee; considers and recommends to the Board, the selection of "independent legal counsel" (as that term is defined in the 1940 Act); and monitors and considers corporate governance issues that may arise from time to time. There were two Nominating Committee meetings held during the fiscal year ended October 31, 2023.

Each Board's Strategy Committee is composed of Gerard K. O'Reilly, Douglas W. Diamond, Darrell Duffie, and Heather E. Tookes. The Strategy Committee assists the Board in carrying out its fiduciary duties with respect to the oversight of the Fund and its performance. At the request of the Board or the Advisor, the Strategy Committee (i) reviews the design of possible new series of the Fund, (ii) reviews performance of existing portfolios of the Funds and discusses and recommends possible enhancements to the portfolios' investment strategies, (iii) reviews proposals by the Advisor to modify or enhance the investment strategies or policies of each portfolio, and (iv) considers issues relating to investment services for each portfolio of the Fund. There were two Strategy Committee meetings held during the fiscal year ended October 31, 2023.

The Mutual Funds-ETF Relations Committee is comprised of George M. Constantinides, Darrell Duffie, and Ingrid M. Werner. At the request of the Board, the Mutual Funds-ETF Relations Committee (i) reviews any newly-proposed expenses to be borne by the ETFs in the Dimensional ETF Trust ("Dimensional ETFs"), portfolios in the DFA mutual fund complex ("Fund Complex") or changes to the existing expense allocations among the Dimensional ETFs, portfolios in the Fund Complex, and the Advisor, (ii) considers any conflicts of interest that may arise in the operations of the Dimensional ETFs and the portfolios in the Fund Complex, (iii) reviews and considers relevant information relating to the operations of the Dimensional ETFs, and (iv) considers asset flows and performance differences between the similarly managed mutual funds and ETFs of the Funds. There were two Mutual Funds-ETF Relations Committee meetings held during the fiscal year ended October 31, 2023.

Certain biographical information for each disinterested Trustee/Director and interested Trustee/Director of the Funds is set forth in the tables below, including a description of each Trustee/Director's experience as a Trustee/Director of the Funds and as a Director or Trustee of other funds, as well as other recent professional experience.

The statements of additional information (together, "SAI") of the Funds include additional information about each Trustee/Director. You may obtain copies of the SAI and prospectus of each Fund advised by Dimensional Fund Advisors LP by calling collect (512) 306-7400 or by mailing a request to Dimensional Fund Advisors LP, 6300 Bee Cave Road, Building One, Austin, TX 78746. Prospectuses are also available at http://us.dimensional.com.

Each officer holds office for an indefinite term at the pleasure of the Board of Directors and until his or her successor is elected and qualified.

VOTING PROXIES ON FUND PORTFOLIO SECURITIES

A description of the policies and procedures that the Fund uses in voting proxies relating to securities held in the portfolio is available (1) without charge, upon request, by calling collect: (512) 306-7400; (2) from the Advisor's website at www.dimensional.com; and (3) on the SEC's website at http://www.sec.gov. Information regarding how the Advisor votes these proxies is available from the EDGAR database on the SEC's website at http://www.sec.gov and from the Advisor's website at www.dimensional.com/who-we-are/investment-stewardship and reflects the twelvemonth period beginning July 1st and ending June 30th.

TAX NOTICE TO SHAREHOLDERS

(Unaudited)

with respect to distributions paid or expected to be paid to shareholders related to the fiscal year ended October 31, 2023. All designations are based on financial information available as of the date of this annual report and, accordingly are subject to change. For each classification below and including The following information is solely for informational purposes. Each Portfolio is designating the U.S. federal income tax character of the following items "Section 163(j) interest dividends" as defined in Treasury Regulation §1.163(j)-1(b)(35) and "Section 199A dividends" as defined in Treasury Regulation §1.199A -3(d), it is the intent of the Portfolio to designate the maximum amount permitted under the Internal Revenue Code and the regulations thereunder. For U.S. federal income tax purposes, shareholders generally must report distributions received from a Portfolio on a calendar-year basis, which therefore may include distributions with respect to portions of two fiscal years of the Portfolio. Annual statements needed by shareholders concerning the tax status of distributions received for the calendar year 2023 (e.g., IRS Form 1099-DIV) will be provided in early 2023. Shareholders should refer to these statements in preparing their calendar year 2023 tax returns. Please consult your tax advisor for the proper treatment of this information. Unless otherwise noted, the amounts in the table are expressed as a percentage of the distributions paid with respect to the fiscal year ended October 31, 2023.

Qualified Dividends

- Qualified Dividends represents the amount that qualifies for the corporate dividends-received deduction under Section 243 of the Internal Revenue Code and is reflected as a percentage of estimated ordinary income distributions (the total of short-term capital gain and net investment income distributions) for the calendar year 2023. $\widehat{\Xi}$
- Qualified Dividend Income represents the amount that qualifies for the reduced capital gain tax rate under Section 1(h)(11) of the Internal Revenue Code and is reflected as a percentage of estimated ordinary income distributions (the total of short-term capital gain and net investment income distributions) for the calendar year 2023. (5)
- U.S. Government Interest represents the amount of interest that was derived from direct U.S. Government obligations and distributed during the fiscal year. This amount is reflected as a percentage of total estimated ordinary income distributions (the total of short-term capital gain and net nvestment income distributions) for the calendar year 2023. Generally, interest from direct U.S. Government obligations is exempt from state income ax. Please consult your tax advisor for the availability of a state tax exemption based on your individual circumstances. 3
- Foreign Tax Credit represents the amount of dividends that qualify for the foreign tax credit pass through under Section 853 of the Internal Revenue Code and is reflected as a percentage of "investment company taxable income" (as defined in Section 852(b)(2) of the Internal Revenue Code). 4
- Foreign Source Income represents the amount of dividends derived from foreign sources and is reflected as a percentage of "investment company taxable income" (as defined in Section 852(b)(2) of the Internal Revenue Code) (2)
- Qualified Net Interest Income represents the amount of interest income available as interest-related dividends generally exempt from withholding taxes for non-U.S. shareholders under Section 871(k)(1) of the Internal Revenue Code. The information is reflected as a percentage estimated ordinary income distributions (the total of short-term capital gain and net investment income distributions) for the calendar year 2023 9
- Qualified Short-Term Capital Gain represents the amount available as short-term capital gain dividends generally exempt from withholding taxes for non-U.S. shareholders under Section 871(k)(2) of the Internal Revenue Code. The information is reflected as a percentage of estimated ordinary ncome distributions (the total of short-term capital gain and net investment income distributions) for the calendar year 2023
