Investment Objective

The Total Return Bond Fund seeks to maximize long-term total return.

The Fund will maintain an average duration between 2 and 8 years. Investments can include government backed securities, money market instruments, and derivatives. The Fund can invest up to 20% of net assets in securities below investment grade.

There is no assurance that the objectives and/or trends will come to pass or be maintained.

Morningstar Medalist Rating™

I, I-2, M, & P Share; Rated 11/7/2024

Analyst-Driven: 100%

⁴ The annualized since inception return for the index reflects the inception date of the TCW MetWest Class I, Class I-2, Class M and Class P Share Funds, respectively. For period 3/31/2000-3/31/2025; 3/6/2020-3/31/2025; 3/31/1997-3/31/2025; 7/29/2011-3/31/2025.

⁵ I-2 Share Class is only available through select financial intermediary platforms.

⁶ For period 3/6/2020-12/31/2020.

⁷ Bloomberg U.S. Aggregate Bond Index – A market capitalization-weighted index of investment-grade, fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities, with maturities of at least one year. The index is not available for direct investment; therefore its performance does not reflect a reduction for fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund.

* The SEC yield is the average annualized net investment income per share for the 30-day period ended on the last day of the monthly.

Morningstar Medalist Rating Disclosure

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

Sector and Quality Analysis Disclosure

1 Other can include Futures, Options or Swaps, if applicable.

2 The credit quality of the investments in the portfolio does not apply to the stability or safety of the Fund. TCW MetWest receives credit quality ratings on the underlying securities held by the fund from Moody's, Standard & Poor's and Fitch. TCW MetWest created the "Quality Distribution" breakdown by taking the highest rating of the three agencies when two or three of the agencies rate a security. If only one agency rated a security, TCW MetWest will use that rating. Gradations of creditworthiness are indicated by rating symbols with each symbol representing a group in which the credit characteristics are broadly the same. Credit quality ratings may be expressed in Standard & Poor's or Fitch's nomenclature, which range from AAA (extremely strong capacity to meet its financial commitments; highest rating) to D (payment default on financial commitments); or may be expressed in Moody's nomenclature, which range from Aaa (highest) to C (lowest). The Not Rated category contains bonds that are not rated by a nationally recognized statistical rating organization. Credit quality ratings are subject to change and pertain to the underlying holdings of the Fund and not the Fund itself.

3 Cash balance may be negative due to unsettled month-end trades.

Portfolio characteristics and securities are subject to change at any time. Negative allocations are due to unsettled month-end trades.

Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to any TCW product or portfolio.

Investment Risks

It is important to note that the Fund is not guaranteed by the U.S. Government. Fixed income investments entail interest rate risk, the risk of issuer default, issuer credit risk, and price volatility risk. Funds investing in bonds can lose their value as interest rates rise and an investor can lose principal. Mortgage-backed and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. MBS related to floating rate loans may exhibit greater price volatility than a fixed rate obligation of similar credit quality. With respect to non-agency MBS, there are no direct or indirect government or agency guarantees of payments in pools created by non-governmental issuers. Non-agency MBS are also not subject to the same underwriting requirements for the underlying mortgages that are applicable to those mortgage-related securities that have a government or government-sponsored entity guarantee. For a complete list of Fund risks, please see the Prospectus.

Glossary of Terms

Asset-Backed Securities – A financial security backed by a loan, lease or receivables against assets other than real estate and mortgage-backed securities. **CMBS (Commercial Mortgage-Backed Securities)** – A debt obligation that represents claims to the cash flows from pools of mortgage loans on commercial property. **Derivative Instruments** – Any type of financial securities that depend on the performance of some type of underlying security in order to have any value. **Duration** – A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. Rising interest rates mean falling bond prices, while declining interest rates mean rising bond prices. **Floating Rate** – Any interest rate that changes on a periodic basis. The change is usually tied to movement of an outside indicator, such as the prime interest rate. **Futures** – A legally binding agreement to buy or sell a commodity or financial instrument in a designated future month at a price agreed upon at the initiation of the contract by the buyer and seller. Futures contracts are standardized according to the quality, quantity, and delivery time and location for each commodity or financial instrument. **Investment Grade** – A bond that is rated Baa3/BBB- or higher by Moody's, Standard & Poors and Fitch. **Mortgage-Backed Securities (MBS)** – A type of asset-backed security that is secured by a mortgage or collection of mortgages. These securities must also be grouped in one of the top two ratings as determined by an accredited credit rating agency, and usually pay periodic payments that are similar to coupon payments. Furthermore, the mortgage must have originated from a regulated and authorized financial institution. **Non-Agency MBS** – Mortgage backed securities sponsored by private companies other than government sponsored enterprises such as Fannie Mae or Freddie Mac. **Options** – A contract that, in exchange for the option price, gives the option buyer the right, but not the obligation, to buy (or sell) a financial asset at the exercise price from (or to) the option seller within a specified time period, or on a specified date (expiration date).
